Hi Brennain,

It was an update; a snapshot in time where no problems or issues were identified. The information was in the presentation. There is no meeting summary.

Heather

Quite right, Heather; I meant the November 10th, 2010 meeting. My apologies for the month mix-up.

I'm not quite sure what you mean, that it was "just an update". No questions asked? No answers provided? Was there no meeting summary? Could you please clarify?

Thank you,

Brennain

Hi Ms. Lloyd,

I think you must mean the Nov 10, 2010 meeting? It was just an update - there were no conclusions/discussions.

Just a note that I currently have conduct of this file so please send future correspondence to me or EA@cnscccsn.gc.ca.

Sincerely,

Heather Harpell

Subject: Request that Meeting Summary from December 2010 be Posted

Dear Ms. Francis

I am writing to request that a summary of the meeting between Ontario Power Generation, Nuclear Waste Management Organization, Canadian Nuclear Safety Commission and the Canadian Nuclear Safety

Commission on 10 December 2010 with respect to the proposed Deep Geological Repository for low and intermediate level radioactive wastes be placed on the public registry established for the federal review of this project.

We have reviewed the agenda and the ppt presentation - both of which are on the registry - and consider that the discussion, conclusions and any action items generated by this meeting should be a matter of public record.

As you know, we have raised concerns in the past about similar meeting reports not being posted on the public registry. My understanding, based on your email of 30 August 2010 was that "all parties now understand that meeting notices/agendas/ presentations/ reports/letters must be on the registry."

Thank you for your attention and assistance.

Regards,

Brennain Lloyd
