Subject: proposed tailings pond in Fish Lake, BC

I am writing in protest of the BC government's recent approval of Taseko Mines Prosperity Project at Fish Lake and Little Fish Lake.

My message is simple:

1) that you work to include the voice of the local inhabitants in your assessment of this project

2) that you consider the shift in paradigm that is occurring in Canada right now, wherein our natural resources and ecosystems are no longer considered simply tools for economic development, but also as entities that defy our understanding and deserve protection

Thank you for your time,
Eldon Pierce

Vancouver, BC
