Subject: Jackpine mine expansion

Regarding environmental impacts of the proposed Jackpine Mine expansion:

I urge the panel to deny the request to expand this mining operation. The expansion would destroy huge areas of sensitive habitat, pollute both land and water and increase greenhouse gas emissions by 2.36 Mt CO₂e/year, representing an increase of 5.2% in oil sands emissions (based on 2009).

This is an unacceptable level of environmental degradation and greenhouse gas emissions, and should be refused on behalf of our children and future generations.

Sincerely,

Reina LeBaron
