Subject: Lelu Island

Dear Ms. McKenna,

I applaud the action you and the new Trudeau government are taking to fight Climate Change. Truly!

As a BC resident I am writing to say I hope that you will stand against the LNG plant on Lelu Island.

Scientists and fishing guides say you couldn't pick a spot that would do more damage to wild salmon habitat than Lelu Island. Add in the climate impacts and fugitive methane pollution from fracking, and this one project could set back the fight against dangerous climate change by years.

Please block this initiative.

Peace,
leah
