Subject: Roberts Bank Terminal 2 review

Hello,

I ask you not to approve the Roberts Bank Terminal 2 project. The area on which it is proposed is vital for the survival of many bird and marine species. It is environmentally unique and sensitive. It is part of a larger area recognized as the Number One Important Bird Area in Canada. It is a major stop on the Pacific Migratory Bird Flyway. Many different species of birds stop here to rest and refuel on their migratory journeys. It is an essential stop for the Western Sandpiper. The fatty acids in the biofilm are a major food source for them. Environment and Climate Change Canada scientists have stated that RBT2 will result in significant adverse impacts to bird species that will be immediate, irreversible, continuous and cannot be mitigated. Their analysis cannot be ignored. It is from an independent, unbiased, recognized government agency. This report alone should provide sufficient justification to decline approval of the project.

Thank you,

Mark Dalton
