Below is an email I sent to Pamela Goldsmith-Jones, my MLA for West Vancouver and her response back to me encouraging me to send my comments to you.

Thank you.

Thank you Caroline for your message. We definitely were hearing this at our two meetings this weekend and it is good to receive people's feedback in writing. I hope you have also sent your comments to the agency, Woodfibre@ceaa-acee.gc.ca

Sincerely,
Stephanie

Subject: Re: Wood Fibre LNG

Dear Ms. Goldsmith-Jones:

I am a resident of West Vancouver. I met you last year at the Persian New Year Festival. Your Farsi was excellent. I wish I could speak as well as you.

<personal information removed> (There are many people out of work - that does not mean we must sacrifice our environment.) Our Premier, Christy Clark wants nothing more than to have an LNG plant in BC, purportedly to 'grow' the economy. Christy Clark is not the only person in BC.

There is huge opposition to this project and last year I attended a West Vancouver City Council Meeting where residents spoke passionately about their coast and their love of the ocean: How the LNG will destroy the habitat in Howe Sound. The Council voted to 'ban' tankers in Howe Sound. A week or so later John Weston had the audacity to tell West Vancouverites that they had no jurisdiction and John Weston had this ban overturned. He did not listen to the people - I did.

I am asking you to listen to the people who love and are committed to ensuring a coast free of LNG and the dangers, noise pollution, distress to animals and destruction LNG can cause. Please, our Premier Christy Clark has no intention of listening to the people. Christy Clark is fast becoming a Canadian version of Donald Trump and she sees everything as a photo op. The people of Kelowna elected her, if she had ran in West Vancouver, I would have fought tooth and nail to oppose her.

If you can use your voice for anything - I believe expressing the opposition that not only I feel toward the LNG, but the people of Squamish and Gibsons and Vancouver.

We must find alternatives to fossil fuels and denying this project is a start.

Thank you.

Caroline Low
