Hello all,

In 2009 we, the Sunshine Coast residents, were signatories to the BC Climate Action Charter. We are working diligently to reduce polluting emissions. LNG tankers and facilities plus fracking goes against our commitment.

The following action by government is not helpful to the cause.

Liberals tabled a budget that reduced renewable energy incentives by cutting the "innovative clean energy special account" by two thirds, from \$14.97 million to \$5.03 million
<http://theyee.ca/News/2013/02/20/BC-Budget-2013/> and announcing a \$120 million royalty credit program for the LNG industry.

Canada invested \$7.5 billion in clean energy in 2013, said Zindler. Most of that was in Ontario, according Clean Energy Canada. By contrast, an estimated \$27 billion was invested in Canada's oil sands.

Media release August 12, 2009

"As signatories to the BC Climate Action Charter, the Town of Gibsons, District of Sechelt, and the Regional District are committed to working cooperatively to reduce greenhouse gas (GHG) emissions".

Respectfully,
Vel Anderson, <contact information removed> BC
