

Subject

Stop Woodfibre LNG from
harming seals and sea lions

Message

Dear Minister Guilbeault,

I am writing today about the Woodfibre LNG export project in Squamish, BC, as part of the IAAC's public comment period. I have serious concerns around the proposed changes to the environmental conditions for the project. These conditions placed on the project are critical to protecting delicate marine ecosystems and ocean mammals, and I urge you to leave them in place without changes.

Currently, Woodfibre is required to implement underwater noise mitigation efforts to reduce impacts on marine mammals, including whales, orcas, dolphins, seals and sea lions. These require them to halt activities if sound levels exceed a certain level and marine mammals are in the designated area.

But I understand that now the IAAC's draft report would approve a change in the environmental conditions that would drastically reduce the size of the area being monitored for underwater noise disruption for mammals such as seals and sea lions - from 7,322 metres to 125 metres.

Stellar sea lions in particular are already listed as a species of "special concern" by the Committee on the Status of Endangered Wildlife in Canada.

Decreasing the monitoring area so drastically will most certainly have an adverse impact on these species of concern, and should not be changed simply because it creates an inconvenience for Woodfibre's construction plan.

Underwater noise could also impact prey in the surrounding area, forcing

Dear Minister Guilbeault,

Michelle Scarr

V3N4W1

I am writing today about the Woodfibre LNG export project in Squamish, BC. I have serious concerns around the proposed changes to the environmental conditions for the project. These conditions are critical to protect delicate marine ecosystems and marine mammals, and I urge you not to approve the proposed amendments.

Currently, Woodfibre LNG is required to implement underwater noise mitigation efforts to reduce impacts on marine mammals, including whales, orcas, dolphins, seals and sea lions. These require them to halt activities if sound levels exceed a certain level and marine mammals are in the designated area.

But I understand that now the IAAC's draft report would approve a change in the environmental conditions that would drastically reduce the size of the area being monitored for underwater noise disruption for mammals such as seals and sea lions - from 7,322 metres to 125 metres.

Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound, a UNESCO Biosphere Region.

Decreasing the monitoring area so drastically will most certainly have an adverse impact on these species of concern, and should not be changed simply because it creates an inconvenience for Woodfibre LNG's construction plan.

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Nancy

Sotham

VON1H0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Marcus

Culver

V8E0A6

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Crista-lea kirk

V8B0A6

I understand the economics and nature have to live together but Woodfibre is the new invasive species on Howe Sound when we are literally starting to see mammals , herring, and the precious ecosystem return to these waters. The local waters are finally starting to rejuvenate from damage done by the mine projects decades back.

Hold to the agreed commitments!

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Say NO to Woodfibre LNG

Dear Minister Guilbeault,

Judy

Hoepfner V9H1N5

I am outraged about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which will undoubtedly increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction. You must be aware that Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure" and that Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Sally Anne DuMoulin V0N1G2

Please listen to a local" ;

I live in the Howe Sound Region

(Bowen Island) and have been so delighted to see the return of a significant number of both Orcas and Humpbacks to our area as well as new annual visits from California sea lions!!!

I can't imagine why we would consider allowing practices that might disrupt or disturb this amazing life affirming progress that has been made in the last decade.

As the final decision maker, I urge you not to approve the proposed changes to the Woodfibre LNG's environmental requirements, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Holly Olivia Edwards V3A9L4

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." V2Y2Y1

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Gail

Riddell

VON3A8

I live around the corner from Howe Sound, and you should know that we have a vibrant sea life here. To subject whales, seals, sea lions and other creatures to terrible noise will cause physical distress, deafness and even death. It is your responsibility to be fair and rationale - not in the pocket of multinationals who don't care at all about biodiversity.

It is bad enough that your government is subsidizing this terrible polluting industry that will/soon be irrelevant.

Don't allow this to happen!

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

David

Huntley

V5A1B4

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Siobhan

Williams

V7R1Z2

I am writing to express my disgust at the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which are both unethical, and inhumane.

Based on these changed, Woodfibre LNG will be allowed to expose pinnipeds to sound levels up to 190 db- the threshold for causing permanent injury. Why is the injury threshold acceptable here?! Why 190 db? It is unbelievable, the blatant disregard for the health and wellbeing of these animals which only now are being able to survive once again in Howe Sound.

Demonstrating to corporations that conditions regarding environment and wildlife can be so easily waived creates a very dangerous precedent. It is 2023. The world is holding the government accountable to hold its resource extraction companies accountable. If you don't do it, who will? What other species and precious ecosystems will we lose, with this mentality paving the way?

We have commitments to make and targets to meet. Please demonstrate your willingness to honour your commitments by not approving these new proposed conditions to Woodfibre LNG.

Thank you,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Judith

Loken

V0N1G2

I am writing to express my concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Manfred Gerschack V5L1Z5

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

harming seals and sea lions

Dear Minister Guilbeault,

Ronald

Bolin

V9T4A1

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes. The game is not worth the candle...

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Slakov

V8A 0A5

Upholding conditions required by environmental concerns is important; please do not weaken requirements for protecting sea mammals during construction of the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these changes being proposed by the proponent, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

I wish our governments had acted to prevent the construction of this boondoggle LNG plant. Please do not compound the harm by caving in on conditions imposed on the project.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Shannon

Klassen

VON1T0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

VON2E0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Dear Minister Guilbeault,

Brenda

McEwan

V7N2N2

Are you aware of how many years it's taken for the marine life to return to Howe Sound after the years of pollution, first from Britannia and then Woodfibre Pulp mill??? And the effort that's gone into decontaminating the area???

The herring are back, seals, sea lions, even dolphins and whales. The proposed LNG plant will reverse all that and kill many of our sea mammals in the process!

Furthermore:

1. Demand for LNG is waning
2. The width of the Sound is less than the internationally published criteria for ocean going ships of the dimensions of the proposed tankers!
3. It's an undisputed scientific fact that the underwater sound they're talking about will cause permanent harm to these creatures - deafness, interference with echolocation, inability to communicate, interference with finding food, and more.

NO! To Woodfibre LNG! And DEFINITELY NO to reducing the noise monitoring distance.

Woodfibre LNG should (must) be held to the original conditions of the environmental assessment!!

SAY "NO" to their request!

am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision

Stop Woodfibre LNG from

V1Y1R6

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Jon

Hadfield

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

I want to also take this opportunity to share my personal connection with Átl'ka7tsem / Howe Sound as the source and sustenance of an incredible amount of biodiversity; part of what makes the Sea to Sky area so special. The Sound is only starting to recover from previous exploitation and misuse by businesses who have demonstrated the same careless pursuit of profit as Woodfibre LNG, with no regard for the non-monetary cost of these practices. Please take this opportunity to allow Átl'ka7tsem / Howe Sound the chance to demonstrate its resilience by rejecting these proposed

Stop Woodfibre LNG from

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Aenea

Cameron

V8B0G5

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As you are the final decision maker, I urge you to not approve these proposed changes, which scientific experts have reported will increase the adverse effects of the project on the wildlife and health of Átl'ka7tsem / Howe Sound and beyond.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Especially during this time of declared Climate Emergency, why would you and your colleagues not have Woodfibre LNG held to the highest standards, and employ the precautionary principle to minimize impacts to such valuable wildlife and ecosystems?

You have the power to reject these proposed changes.

As a lifelong B.C. resident who votes in every election, I ask you to reject these proposed changes and to take actions to ensure wildlife and ecosystems are protected effectively, stewarded and prioritized over

Stop Woodfibre LNG from
harming seals and sea lions

Bradbury

VON2E0

This letter is to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you NOT to approve these proposed changes that I believe will increase the adverse effects of the project on the local wildlife.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please REJECT these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Kathleen Tait

VOR2W0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Stephanie Grindon V0N1V5

I am writing to express my distress about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

I am blessed to live and work here and am trying to start an organic farm in Howe Sound. I have been living here for 30 years and have personally witnessed the biological comeback as the Sound has been healing after so much industrialization. Let the dirty dinosaur fuels stay in the past and in the ground. Stop this insane suicidal project!

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Thomasina Pidgeon V8B0B6

I ask that you keep the condition on the Woodfibre LNG environmental assessment that requires them to stop construction if marine mammals came close enough that the underwater noise would disturb or injure them.

I further request that the monitoring area for seals and sea lions during pile driving remain at 7,322 metres, and to therefore refuse Woodfibre LNG's request to change it to a mere 125 metres. Noise pollution is a big concern for all animals and the needs of marine life must be equally respected. Human-caused underwater noise can reduce marine mammals' ability to communicate, find food, escape predators, and survive, and can cause injury or permanent hearing loss.

Steller sea lions have only recently returned to Howe Sound after years of industrial pollution. Let's not make the same mistake as the previous generations. We must respect all our relations.

Please make life difficult for Woodfibre LNG and say no to their requests. Helping WFLNG save a few bucks versus helping protect the life in our waters is a priceless action that we, the people, ask of you.

Marine life deserves protection, not a corporation.

Sincerely,

Thomasina pidgeon

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Sarah O'Lear O'Leary

V7Z 0H8

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Dear Minister Guilbeault,

Paul

McBride

V8B0A6

As a resident of Squamish and lover of Átl'ka7tsem / Howe Sound I am concerned about the recent proposed changes for the Woodfibre LNG export facility. By requesting to lower the standards of their responsibility to observe impacts, they are lowering their standards of respect to our community and the local marine life that call this special place home. It is their responsibility to conduct work in a non harming manner, and I believe the changes allow for them to harm marine life while absolving themselves of the responsibility they need to take to minimize impacts.

As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Sarah

Johnston

VOA 1T0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Ingrid

Wirsig

M5A3G5

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Debbie

Bloomfield V3L4M1

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility.

As the final decision maker, and a former activist for the environment, I urge you not to approve these proposed changes, which will increase the adverse effects of the project. It is your job to protect the environment not the people that want to exploit the system in place to protect the environment, including the perils that have already been listed for this area! When will you stand up for the environment!

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems. Do you think you would enjoy this sound, that is amplified in the water, around you for most of the day? Is the unseen living species under the surface of the water that insignificant to you as the Environment Minister? Who could you be pandering to. It is time for Canada to return to it's true sovereignty!

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Lynn

Russell

V7W2B8

I want to let you know that I have deep concerns about the proposed changes to conditions for the Woodfibre LNG export facility. I live on Gambier island in Howe Sound and these changes will set back the important environmental progress that has been made in this area. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

As you know, Woodfibre has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction. This is unacceptable.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Jonathan Wreglesworth VON 2EO

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Ruby

Armstrong VON 1T0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

V3B2M6

I am writing to express my deep and significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 meters to just 125 meters during construction. That is a huge difference. That sound will be the equivalent of close proximity repeated shotgun blasts. That noise will be extremely uncomfortable, stressful and frankly straight up inhumane torture towards marine life in Howe Sound.

When Woodfibre LNG received Federal approval in 2016, condition 3.8 of its environmental assessment certificate required it to stop construction if marine mammals came close enough that the underwater noise would disturb or injure them.

Woodfibre LNG has been aware of this federal condition for 7 years and right in the middle of construction tries to claim that this project will "not be economically feasible" if they have to follow this rule that protects marine wildlife. If it's not feasible unless they can harm and injure all that lives there, maybe they never should have started building it 7 years ago! The disturbing fact is why would Woodfibre LNG build a project that is not economically feasible? They knew this 7 years ago. Its clearly not a smart choice to build such a facility in a sensitive ecosystem. It's not ok for companies to pretend they will follow the environmental assessments set forth only to try and cancel it 7 years into their project. Canadians are not

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Milo

Manugian

91405

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Barbara Bradbury V6K 2M7

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Leslie

Page

V9A7E9

I am writing to express concern about the proposed changes to the development conditions for the Woodfibre LNG export facility. As the final decision maker, you have an opportunity to make an important difference by not supporting these proposed changes; changes which significantly increase adverse environmental effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction. This is a 58 fold decrease in the distance and the sound impacts will be massive.

As you are aware, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound. For this reason, Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please make a positive difference to our already beleaguered environment and reject these proposed changes.

Sincerely, Leslie Page

Stop Woodfibre LNG from
harming seals and sea lions

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Megan

Curren

V7G1T1

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Dear Minister Guilbeault,

Jo

Burnett

VON1T0

I am told you have the final say on whether or not Woodfibre LNG is able to reduce its monitoring area for seals and sea lions during pile driving from 7,322 metres to just 125 metres.

I urge you to please NOT approve these changes.

Átl'ka7tsem is their home. Exposing seals and sea lions to sounds loud enough to cause injury and even permanent hearing loss is simply unacceptable.

There would be huge outcry if we as humans were exposed to such noise, so why turn a blind eye for marine mammals already at risk?

If Woodfibre LNG is not economically feasible without disturbing and causing harm to marine life, then it should simply not go ahead.

Please reject these proposed changes.

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

t

jojic

VON2W0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

I do not think the project should be going ahead at all, because of LNG's methane leakage and the contamination of freshwater from fracking. However, if the project is going ahead, it should be with the least possible harm to Howe Sound. Subjecting local marine wildlife to noise levels that could permanently damage their hearing, a sensory input that they rely on in the water, is cruel and inhumane. It goes against our image as "beautiful British Columbia". Please do not approve the application of Woodfibre to change their noise level area/permit.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." harming seals and sea lions

Dear Minister Guilbeault,

Ashleigh

Leier

VON1T0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Ann

Ramsay

VON1G0

We have owned a home on Bowen island for 28 years. It has been incredibly heartening to see the significant return of sea life in our waters in the last few years: seals, dolphins, whales and sea lions.

Woodfibre LNG has requested a change in the environmental restrictions that were applied to the approval of their construction project, as they find that they are currently not 'economically viable'. They propose that the monitoring area for seals and sea lions during pile driving be reduced from 7,322 metres to just 125 metres.

I urge you to stay with the original 'ecologically viable' decision that was made in giving approval to proceed with this project. There are already many other hazards associated with an LNG industry in the Squamish location. I ask that you take a stand against this request.

Stop Woodfibre LNG from

Dear Minister Guilbeault,

Jackie

DeRoo

V6R1J2

As a 40 year summer resident of Howe Sound, I am very concerned that Woodfibre LNG is proposing significant reductions to the original sound buffer requirements for their project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction. THIS IS THE VIRTUAL ELIMINATION OF THE PROTECTION ZONE.

Woodfibre LNG is located in the newly designated Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

One has to ask - what has changed that prompts Woodfibre to suddenly propose the virtual elimination of the original wildlife protection requirements? There were, and still are, good reasons for the original standards.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems in the UNESCO biosphere region.

Please reject these proposed changes.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

James

Askew

V7V2B2

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Mr. Rafe Sunshine V8R1B5

As a citizen of British Columbia and grandfather to three beautiful grandchildren, I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project. Not only will it deafen marine mammals but it will increase marine traffic as ships run into the many whales that have returned to the Salish Sea.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems. The continuing of fracking is increasing Canada's emissions to unacceptable levels and this project can only exacerbate the burning of more fossil fuels to the detriment my three beautiful grandkids and future generations of Canadians.

Please reject these proposed changes.

Stop Woodfibre LNG from
harming seals and sea lions

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Donald

Bregg

V0N1G2

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Elizabeth

Steves

V3T5W2

I am deeply concerned about the proposed changes to the water noise legislation in Howe Sound, as well as the new Woodfire LNG export facility. As a biologist who often looks at ecosystems and ecosystem function, as we degrade ecosystems with acts like these, we degrade our future. Piece by piece we erode biodiversity in this province, destroying our own chances of survival in the future. With climate change causing further looming catastrophe, I wonder why allowing such changes would cross your mind. Please consider future generations when you think about what is the best outcome for this precious habitat. I am asking you not to approve these proposed changes, and instead, be a steward for this land.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

RE: Draft analysis of proposed changes to Woodfibre LNG project decision
statement conditions:

I am writing briefly to express my firm opposition to the proposed changes
regarding allowable noise levels due to construction at Woodfibre LNG.

I have followed scientific and community discussions closely (I reside in
Ātl'ka7tsem/Howe Sound) and firmly believe allowing these proposed
changes will have an irreversibly negative effect on a bioregion still
recovering from the previous industrial enterprise.

The timing of this exercise is also highly suspect, with the IAAC's review of
WFLNG's proposed amendment to Condition 3.8, including this public
comment period, falls before the launch of Canada's Ocean Noise Strategy.
How convenient; so typical. Industry pulls another fast one and no one with
the power to correct it steps up.

I'm sure the end result will be that WFLNG gets exactly what they want but
at least I have stated my opposition publicly.

Thank you for reading.

Scott

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

V7J2N5

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Dear Minister Guilbeault,

Aeron

Wild

V6E2E2

I am writing to express my concern and to say that I am very disturbed about the proposed changes to conditions for the Woodfibre LNG export facility. I fear that these changes are going to cause great harm and disruption to wildlife, marine animals and the marine ecosystem.

Seals and sea lions like many marine species are very sensitive to sounds, vibrations and water pressure. Their hearing is very delicate and they rely on their hearing for every aspect of their lives, to find food and to hunt, to communicate with one another, to find each other in deep or murky waters or at great distances, and to warn each other of danger. It is our responsibility to respect other species and to protect them from human activities that are detrimental to their welfare.

Many marine species are now at risk, endangered or critically endangered and they are experiencing great stressors from climate change, habitat loss, food insecurity and the ocean micro-plastic crisis. In addition they are bombarded with the constant noise from the motors of boats, ships and sonar. We have already completely altered their environment. Going forward we must do all we can to make responsible and insightful choices that will limit our impact by being vigilant in our commitment to preserve the health of marine animals and ocean biodiversity. The ocean is in crisis and at this critical stage reckless decisions are unjustifiable.

The Howe Sound UNESCO Biosphere region is a rare and vitally important marine environment. The location of Woodfibre LNG in relation to the biosphere is precarious at best and because of their proximity their activities must be regimented and under strict guidelines or they will ultimately endanger this "cultural and ecological treasure".

Please reject the proposed changes as they are unsound and irresponsible

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Wendy

Phillips

S4T7T8

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Vic

Booth

V9P9B4

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

V6T2H2

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Irene

Wotton

V7M1M6

At this time when our planet and its climate is pushed to the tipping point and when extinction rates of plants and animals are increasing, we must not relax any regulations set up to safeguard the plants and animals that are an integral part of our planet's ecosystems. While we cannot yet survive without fossil fuel products, this is a highly profitable industry and the companies doing research, extraction, storage and shipping need to do this in the most ecologically and environmentally supportive way as is absolutely possible with the knowledge and equipment we have today.

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

It is totally ridiculous to reduce the noise monitoring area in a UNESCO Biosphere Region. Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Jocelyn

Parsons

L1G1B6

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Please don't let Woodfibre
LNG harm seals and sea lions

Dear Minister Guilbeault,

john

dowler

VON1G1

For many years Howe Sound was relatively barren of life due to the legacy of the Britannia mine. In recent years, with significant costly work, the mine impact was ameliorated and finally we have been seeing an uptick in life. This has been a long hard struggle and the success was one source of optimism in a world that deals blows to the environment every day.

I understand that it is your decision that will determine whether another industrial assault on our wildlife will occur. It is so easy to approve 'temporary' damage when pressure comes from industry, jobs are involved, and one lives thousands of miles from the area of impact.

But this time, it is you personally in the position of approving the impact. I hope you have been watching as I have the litany of excuses and backtracks on the environment that make the general public wonder if there is any future at all, if no government actors will take seriously our pleas to follow their promises. Why was the promise of over 7,000 meters of monitoring made in the first place? Was it a way to convince people to allow this new industry in the sound, only to pull the rug out when any inconvenience was felt?

Please, please don't follow the pattern of past decision makers; please let the original decision stand and begin to rebuild faith that your government is one that will actually take wildlife preservation seriously, and do not allow the monitoring distance to be lowered to a paltry couple of hundred meters.

thank you

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Leah

Horlick

S7K0A7

I am writing to express my deep concern and anticipatory grief over proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project. The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

As I am sure you have been made aware, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound. I lived on the west coast for many, many years and though I have since relocated to my home province of Saskatchewan, the power and vulnerability of this area and its wildlife will stay with me for the rest of my life. Please reject these proposed changes. We cannot accurately assess how hearing loss will impact these creatures, but I trust you are fully aware of its impacts on humans and would hate to inflict such a loss on another living being.

In a time where seemingly inevitable climate change confronts many of us with a feeling of true hopelessness, this is one of the few areas where you and I could make a concrete change for the good of the natural world that sustains us. Please help hold Woodfibre LNG to the highest standards, and ensure that they employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Scientific evidence suggests that when underwater noise levels generated by impulsive sound sources (e.g., pile driving) exceed 160 decibels (dB), a 125-m pinniped-specific exclusion area, as proposed in this amendment, will not protect pinnipeds from permanent hearing damage. Measurements of the effects of pile driving on pinnipeds, specifically harbour seals, demonstrate that 100% of seals that approach within 7km of pile driving activities experience temporary and/or permanent threshold shifts (Whyte et al., 2020). In a separate study, 60% of seals that approached within 10km of pile driving activities experienced underwater noise levels associated with causing permanent threshold shifts (Hastie et al., 2015).

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

JAN

DEDONDER V8B0C1

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Rebecca

Bittel

V7H2L9

I am very concerned about the potential significant negative impacts of the Woodfibre LNG project on the ocean and the wildlife that reside within it. This is especially so given the special nature of the Unesco-recognized Howe Sound Biosphere. It should not be approved.

Yours truly,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Christine Van den Meer VOR1W0

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Dear Minister Guilbeault,
cc: Patrick Weiler, MP
cc:
Members of the Impact Agency of Canada,

Roger Brownsey VON1G1

I write as a concerned BC citizen living on Bowen Island, in close proximity to the proposed new Woodfibre LNG facility. Equally importantly, my home looks across Howe Sound/Atl'Ka7tsem. From my viewpoint the sound is perhaps 3Km wide, meaning that a large LNG vessel can be no more than 1.5 Km from the populated shores on either side.

To begin, I understand that the limitations that apply to various aspects of the construction at the Woodfibre site are still being debated and that the company is asking that restrictions should be reduced for their convenience and to their advantage. In particular, the proponent has apparently requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction. Considering that this site has been historically heavily contaminated by prior industrial activity, I believe that further disruption of the area, both above and below sea level will have potentially damaging effects on flora and fauna both immediately and potentially in the long term. It is therefore critical that Woodfibre LNG be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

I also write to express my concerns about general aspects of this new industrial in this location. I therefore ask you to fully consider a number of hazards associated with the proposed facility and to assess these hazards

Wuethrich V8B0X5

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Michelle Winslow VON 1T0

I don't support the proposed changes to conditions 3.8 and 6.4, and ask you not to approve these changes, which I believe will increase the adverse effects of the project.

Woodfibre LNG has not provided evidence to support assertions that the proposed changes to conditions 3.8 and 6.4 will not result in increased adverse effects.

Located in a UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure, we need to ensure higher standards for environmental care in Howe Sound and the impacts on the Squamish estuary.

Woodfibre LNG must be responsible for water quality and sediment during all phases of the project, including decommission. They should not be allowed to limit containments.

Please reject these proposed changes.

Sincerely,
Michelle Winslow

Dear Minister Guilbeault,

Katarina

Kuba

V8B0A6

Surely you are aware and been told countless times of the devastating outcomes if you approve the proposed changes.

You are in the position to make change. Perhaps this change is unimportant to you as you don't live in the area, and you excuse yourself knowing that some people will always be unhappy with the decisions you will make. This is true, it's not easy to be in your position but it doesn't justify that the quality of all life will be significantly negatively impacted because of your decision. Any incident or climate related issues that arise from the approved changes will be because of you and that is your responsibility. Action expresses priority. If you can agree to these changes fully aware of the consequences and be happy about yourself, than I guess no one will be able to change your mind. Your legacy will not be of significance but grouped with the rest of those who chose inaction. Be careful of not being hypocritical with talks of support of climate change policy or that you're trying your best personally because this is the time to do it.

The choice that's hardest to make is always the right one. This isn't the only way it can be done. People are creative, innovative and resourceful and better solutions can always be found. We all live in on this beautiful Earth together, we're supposed to protect and care for all forms of life that don't have voices. Every bit of Earth is significant.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Sabra

Woodworth V7K1N9

Howe Sound is an ecological treasure for all but those who use double-speak to maintain that impacting it in major ways for private gain will nonetheless keep it an ecological treasure, namely industry+government.

Do you really believe establishing an LNG fossil fuel export project in Howe Sound is not an outright contradiction to the *raison d'Être* for a UNESCO Biosphere Region?

I am writing to express my disbelief regarding the proposed changes to conditions for the Woodfibre LNG export facility. I urge you as the final decision maker not to approve these proposed changes, which I believe can only increase the inevitable adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

It's laughable! Why even have a monitoring area if the proponent can simply ask it be virtually eliminated? Is this a joke? What's the next impact to be requested to be reduced? Or even violation that will not receive any consequence?

Woodfibre LNG is located in the Átl'ka7tsem, a region recognized internationally as "a cultural and ecological treasure", a UNESCO Biosphere Region! Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem /

Dear Minister Guilbeault,

Michael Gallimore V8B0X1

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

Particularly I'd like you to consider that the decibel scale for sound levels in air doesn't mean the same thing in an underwater context: animals underwater are vulnerable to damage from sound travelling through their bodies in a way that terrestrial species are not.

The use of single figure dB values for underwater acoustic measures is only ever telling part of the story, and it is possible to make errors in judgement which could have severe negative consequences for the wildlife in the sound.

In addition to this, recommended sound exposure levels are normally quoted for continuous noise levels, and are less well defined for short impulsive sounds such as pile driving.

This paper outlines some of the wrong assumptions people make when applying a naive conversion factor for underwater sound:
<https://www.sciencedirect.com/science/article/abs/pii/S0003682X07000977?via%3Dihub>

Because of the differences between underwater and overwater acoustic measures, and the many possibilities for misinterpretation and

Stop Woodfibre LNG from

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault:

Judith

Hammill

VON1V8

I am deeply concerned about the proposed changes to conditions for the Woodfibre LNG export facility. As you are the final decision maker, I implore you not to approve these proposed changes because they will without doubt increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

We know that undersea noise travels many miles. Reducing the monitoring area will have a negative effect on living beings in the water.

Moreover, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound. Whales, which can hear undersea sounds from hundreds of miles, have also returned to this recently recovered area.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.

Sincerely,

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Fran

Stop Woodfibre LNG from
harming seals and sea lions

Dear Minister Guilbeault,

Magdalena Gronowska V8B1J2

I was drawn to the community of Britannia Beach for its breathtaking natural beauty and my ability to access snowcapped mountains, lush coastal rainforests and ocean recreation right from my doorstep. This area also boasts a plethora of land and marine wildlife, and our community has witnessed a resurgence of Orcas, dolphins and whales in the Sound. Our growing Britannia Beach community is also the closest residential neighbour to the proposed Woodfibre LNG plant, which will have direct impacts on our community.

I am originally from Ontario, where I've worked for the Ministry of Environment and the Ministry of Energy in the areas of climate change policy, air policy, water policy, air and GHG mitigation technologies, and electricity rate mitigation policy. After reviewing Woodfibre Ltd.'s proposal from the perspectives of a policy maker, environmental scientist, and affected resident, there are several areas of concern to me.

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound
