

Note: The following form letter was submitted by 977 individuals (listed on the following pages) as part of a letter writing campaign to the Impact Assessment Agency of Canada.

Dear Minister Guilbeault,

I am writing to express my significant concern about the proposed changes to conditions for the Woodfibre LNG export facility. As the final decision maker, I urge you not to approve these proposed changes, which I believe will increase the adverse effects of the project.

The proponent has requested that the monitoring area for underwater noise impacts to seals and sea lions be reduced from 7,322 metres to just 125 metres during construction.

However, Woodfibre LNG is located in the Átl'ka7tsem / Howe Sound UNESCO Biosphere Region, which is recognized internationally as "a cultural and ecological treasure." Steller sea lions are listed as a species of "Special Concern" under the Species at Risk Act, and have only recently returned to Átl'ka7tsem / Howe Sound.

Woodfibre LNG must be held to the highest standards, and must employ the precautionary principle to minimize impacts to wildlife and ecosystems.

Please reject these proposed changes.
