**Comments:**

To our decision makers,

They just replaced the 20 yr old concrete entombment around the Chernobyl reactor that blew in 1986, because it was falling into ruin, as predicted. It cost \$2B or so, and since Soviet Russia is no longer there to pay for it, every body else in eastern Europe had to, somewhat reluctantly. Concrete is no solution.

Concrete is not impermeable to water, as everyone with a basement knows, and leaching can be guaranteed.

The plan to entomb this nuclear reactor not 400 meters from the Ottawa River should be scrapped. Listen to the concerns of the people who live there.

Sonia Cirka
