**Comments:**

Attn:

Lucia Abellan, Environmental Assessment Officer  
Canadian Nuclear Safety Commission  
Comments on CNL's EIS for the Nuclear Power Demonstration (NPD) Closure Project at Rolphton, Ontario

I am submitting this on the last day after reading through all the comments that have already been submitted. I agree with most of concerns in the public submissions that have already been sent to you, especially those that have been expressed regarding low cost versus integrity. I also seriously question why CNL would consider a so called solution that does not live up to international standards. My trust in CNL is low considering the way CNL staff promoted the technology for the proposed NSDF as "proven technology" and that it would "mostly be just demolition waste" without explaining the specifics such as Intermediate Level Waste which is not appropriate in such a facility. How can we trust CNL with this proposal?

Craig Robinson
