Re: Springbank Off-Stream Reservoir Project - Comments

Danitada,

The Tsuut'ina Nation is submitting these comments regarding the proposed changes to the Project and Decision Statement.

We ask that you change the statement "Indigenous groups" within the Decision Statement, it implies we are a special interest group and minimizes us as rights holders.

As for the statement of satisfaction with the consultation process, we still have concerns, the proposed staging areas is not resolved and the issue of selling crown land is not addressed to our satisfaction.

The proposed changes to segments of the fencing for the Springbank Project are a necessity, we observed that the elk are still migrating within the area, and we are satisfied with the fencing and for the safe passage of wildlife.

We are committed to ongoing engagement and appreciate the opportunity to provide comments as needed.

Siiyisgaas!
