Subject: Health Canada's advice on the Technical Review of the Lynn Lake Gold Project - Information Request Round 1 Package 3

Dear Chelsea Fedrau:

Health Canada has completed a review of Alamos Gold Inc.'s (Proponent) responses to Information Request Package 3 for the proposed Lynn Lake Gold Project (the Project), which is currently undergoing Technical Review. Health Canada is participating in the environmental assessment review of the Project as a Federal Authority under the *Canadian Environmental Assessment Act, 2012* (the Act).

Health Canada's comments are included in Attachment 1 for your consideration. In general, they pertain to the human health risk assessment of potential Project-related impacts.

Please feel free to contact me at julie.c.anderson@hc-sc.gc.ca if you have any questions regarding Health Canada's comments.

Sincerely,
