March 5, 2026

Tara Bailey, Project Manager
Impact Assessment Agency of Canada
600-55 York Street, Toronto, ON M5J 1R7

Dear Ms. Bailey,

On behalf of **Morgan Fuels**, I am writing to express our strong support for the advancement of First Mining Gold's Springpole Gold Project. As a northern Ontario-based fuel and logistics provider with decades of experience serving remote industrial operations, Morgan Fuels has supported First Mining Gold throughout their exploration activities at Springpole. In this work, we have seen firsthand their consistent commitment to safe practices, environmental responsibility, and respectful collaboration with local and Indigenous communities.

Our operations at Springpole have aligned closely with First Mining Gold's environmental stewardship goals. Morgan Fuels adheres to strict fuel-handling, storage, and transport protocols designed to protect water quality, prevent spills, and minimize risk to sensitive ecosystems. At the Springpole site, First Mining Gold has demonstrated rigorous environmental oversight—maintaining strong spill-prevention measures, continuous monitoring programs, and a proactive approach to risk management. Their high standard of environmental performance and transparent communication ensures that contractors like us can operate safely and responsibly within a clearly defined environmental framework.

The Springpole Project represents a significant economic opportunity for northwestern Ontario, with meaningful potential for long-term employment, local procurement, and regional capacity building. As a company deeply rooted in the North, Morgan Fuels values projects that contribute to sustainable regional development. Springpole has already generated substantial economic activity among local businesses, and its advancement would continue to strengthen northern supply chains and community prosperity.

Based on our direct experience working with First Mining Gold and our confidence in their environmental integrity, Morgan Fuels supports the approval of the environmental assessment for the Springpole Gold Project and encourages the Government of Canada to allow the project to move into the next stages of development and permitting.

Sincerely,

<Original signed by>

Darrell Morgan
