Subject: Health Canada's review of the Information Requests (IRs) for the West Flemish Pass Exploration Drilling Project

Dear Mr. Keeping:

Health Canada (HC) is participating in the environmental assessment review process for the West Flemish Pass Exploration Drilling Project as a Federal Authority under the *Canadian Environmental Assessment Act, 2012*.

As requested on June 4, 2020, HC has undertaken a technical review of the IRs for the West Flemish Pass Exploration Drilling Project. As the IRs and corresponding responses do not relate to HC's technical review of this project, we have no additional comments on this submission.

If you have any questions, please contact the undersigned at your convenience.

Sincerely,

<original signed by>
