Mr. Lachlan Maclean, PhD.  
Project Manager  
Impact Assessment Agency of Canada, Atlantic Region

**Re: Technical Review – Boat Harbour Remediation Project Environmental Impact Statement**

Lauchie:

As requested, Transport Canada has reviewed the Boat Harbour Remediation Project Environmental Impact Statement (EIS) for sufficiency and technical merit. More specifically, Transport Canada reviewed the EIS for those aspects of the project related to its mandate, mainly navigation.

Overall, the EIS provides sufficient information for Transport Canada's purposes and role in the Environmental Assessment.

It should be noted, that while Nova Scotia Lands Inc. has identified the components of the project that may require authorization under the *Canadian Navigable Waters Act* (CNWA), to date applications for approval of these works have not been received by Transport Canada – Navigation Protection Program. Transport Canada's technical review for potential impacts to navigation will therefore only occur once the details of these works are known and application(s) are submitted; generally after the Environmental Assessment.

If you have any questions, please feel free to contact me at [jason.flanagan@tc.gc.ca](mailto:jason.flanagan@tc.gc.ca) or 506.227.8257.

Regards,
