Subject: Health Canada's review of the Information Requests (IRs) for the BHP Canada Exploration Drilling Project

Dear Joe Vidger:

Health Canada (HC) is participating in the environmental assessment review of the BHP Canada Exploration Drilling Project as a Federal Authority under the *Canadian Environmental Assessment Act, 2012*.

As requested on June 29, 2020, HC has undertaken a technical review of the IRs for the BHP Canada Exploration Drilling Project. As the IRs and corresponding responses do not relate to HC's technical review of this project, we have no comments on this submission.

If you have any additional comments or questions, please contact the undersigned at your convenience.

Sincerely,
<original signed by>

Sara Rumbolt
Regional Environmental Assessment Specialist
Health Canada, Atlantic Region
