

Identifying and describing possible project effects on valued components

Please tell us what is important to you. The Impact Assessment Agency of Canada invites you to identify “valued components” that are important to your community.

The term “valued components” refers to aspects of the environmental, health, social, and economic conditions that are important to you and your community.

Please explain who in your community uses each valued component and how you think the valued component and its use might change due to the Webequie Supply Road Project. You may wish to describe the changes in terms of resources (how much of the valued component is available?), access (how easily can you access the valued component?) and experience (how does the valued component make you feel?). Please review the examples here, and complete the similar table on the next page.

Examples

1. What are the valued components of your community?	2. Who uses and/or relies on each valued component?	3. Which project components or activities may affect each valued component?	4. How would the valued component be affected by the Project?
Migratory Birds (Environmental) 	Migratory birds are culturally significant to all community members	Clearing - Removal of trees and vegetation 	<u>Resource:</u> Habitat loss and potential destruction of nests and birds
Mental Health (Health) 	Youth who are learning about traditional practices	Restricted Access - Inaccessible areas due to project construction 	<u>Access:</u> Restricted access to sites and places of interest and value impedes cultural learning and contributes to loss of Indigenous identify
Navigation (Social) 	Community members that use local rivers to travel	In or Near Water Construction - Construction of dams and other in-water structures 	<u>Access:</u> Reduced ability to travel on the river
Jobs (Economic) 	All community members, directly or indirectly, rely on income from jobs to improve community and family well-being	Employment - Potential employment opportunities 	<u>Experience:</u> Less financial stress from higher income

1. What are the valued components of your community?	2. Who uses and/or relies on each valued component?	3. Which project components or activities may affect each valued component?	4. How would the valued component be affected by the Project?
Clean water (surface and ground) / Protection of spring water sources	All community members	Road construction and operation	<u>Resource</u> – Potential impact on water quality (surface and/or ground)
Healthy, sustainable wildlife population (i.e., fish/caribou/moose/fur-bearing animals)	All community members	Road construction and operation	<u>Resource</u> – Loss/fragmentation of habitat, damage to fish habitat during construction
Protection of sacred sites / gravesites and other culturally significant areas	All community members	Road construction	<u>Resource</u> – Potential for impact during construction phase
Hunting areas / family camps	All community members	Road construction and operation	Experience - Disturbance (noise) during construction and operations
Protection of plants / vegetation, as these are both a food source and a source of medicine	All community members	Road construction and operation	<u>Resource</u> – Loss/fragmentation of habitat, impacts of dust, other air emissions
The ability of the community to pursue economic opportunities	All community members	Employment and potential commercial opportunities	

Enclosure #3.2 – Worksheet on Valued Components

<p>based on responsible use of the natural resources within our traditional territory</p>			<p><u>Experience</u> - Less financial stress from higher incomes.</p>
<p>The ability for community members to achieve a greater level of well-being, including physical and mental health</p>	<p>All community members</p>	<p>Potential social problems created by higher levels of income.</p>	<p><u>Experience</u> - Employment could provide community members with significantly higher income levels. This could cause social problems if community members are not prepared for employment through provision of training in areas such as personal finance, budgeting, etc.</p>
