Subject: RE: INFC comments on the Tailored Impact Statement Guidelines for the Webequie Supply Road and Marten Falls Community Access Road Projects

Sensitivity: Normal

Hi Rebecca,

As Infrastructure Canada is not providing federal funding to this project, and per the mandate of our department we do not have the federal expertise to provide comments on these projects, therefore INFC has no comments.

Many thanks,

Deborah Campbell

Subject: INFC comments on the Tailored Impact Statement Guidelines for the Webequie Supply Road and Marten Falls Community Access Road Projects

Hi,

I'm emailing to enquire about INFC's comments on the Tailored Impact Statement Guidelines (TISGs) for the Marten Falls Community Access Road and Webequie Supply Road projects. The Agency contacted all Federal Authorities on December 19, 2020, requesting comments be provided on the Draft TISG by January 17, 2020.

The Agency expects that, at a minimum, your department review the Social (sections 10 and 17), Economic (Sections 11 and 18), and Projects Contribution to Sustainability (Section 24). Please provide your comments on the TISGs using the Disposition Table we transmitted to you on December 19, 2019, and attached here. This includes your review of how the Agency has applied previous comments provided by your department. We require your comments no later than January 28, 2020, the official end of the public comment period if they are to be applied to the final TISGs.

If your department does not have any comments please confirm that is the case and indicate that your department has reviewed the sections noted above so we can confirm they have received validation from your department. If there are areas where you do not have expertise, please identify those, so that we can ensure there are no gaps in our review by Federal Authorities.

The TISGs for both projects can be found on the Registry at:

<https://www.iaac.gc.ca/050/evaluations>

Thank you,

Rebecca D'Onofrio
