

ECCC Comment Tracking Table – IAAC Amendment Application Documents for the Cedar LNG Project

Comment #	Document	Location (Page Number and Section Title)	Subject	Comment
ECCC-01	IAAC Draft Federal Decision Statement Document	Page 50	Additional detail related to accidents and malfunctions notifications	<p>Section 12.7.3 of the Draft Federal Decision Statement Document outlines the information required in a notification following an accident or malfunction. However, it does not specify that the quantity of substances released into the environment <i>must</i> be provided within this notification. The quantity of substances released into the environment is essential for conducting a comprehensive risk analysis of the potential impacts and informing requisite follow up actions.</p> <p>ECCC recommends modifying Condition 12.7.3.3 (see below) to require the quantity of substances released, ensuring that this critical information is reported in the event of an accident or malfunction:</p> <p>“12.7.3.3 A list <b>and quantity</b> of any substance potentially released into the environment as a result of the accident or malfunction; and ...”</p>
