Email	<email address removed>
Telephone	604-353-4733
Alternate Departmental Contact	Sue Olsen, <email address removed> 604-418-6236

-
1. Is it probable that your department or agency may be required to exercise a power or perform a duty or function related to the Project to enable it to proceed?

If yes, specify the Act of Parliament and that power, duty or function.

No.

2. Is your department or agency in possession of specialist or expert information or knowledge that may be relevant to the conduct of an impact assessment of the Project?

Specify as appropriate.

Our department has specialist knowledge in emergency management, but we do not expect that it would be applicable to this project.

3. Has your department or agency considered the Project; exercised a power or performed a duty or function under any Act of Parliament in relation to the Project; or taken any course of action that would allow the Project to proceed in whole or in part?

Specify as appropriate.

No.

4. Has your department or agency had previous contact or involvement with the proponent or other party in relation to the Project? (for example, enquiry about methodology, guidance, or data; introduction to the project)

Provide an overview of the information or advice exchanged.

No.

5. Does your department or agency have additional information or knowledge not specified, above?

Specify as appropriate.

A role that Public Safety could have, should there be a major emergency related to the site or project in the future, would be to facilitate federal and federal/provincial coordination during emergency response. Note that this would be for a major incident exceeding the routine response mechanisms for involved departments.

While we do have an interest in disaster risk reduction, which can include any measures to reduce the likelihood of an emergency and environmental or community impacts, this project is most likely out of scope as our work in this area comes from a broader policy lens, and likely specific requirements to prevent or mitigate incidents related to this project will be prescribed by regulations.

6. From the perspective of the mandate and area(s) of expertise of your department or agency, what are the issues that should be addressed in the impact assessment of the Project, should the Agency determine that an impact assessment is required?

For each issue discussed, provide a concise, plain-language summary that is appropriate for inclusion in the Summary of Issues and Engagement.

From the perspective of Public Safety Canada Pacific Regional Office, the issues that should be addresses include preventative, mitigative, and response measures to manage any potential large scale emergencies or disasters that could be related to the project.

Andrew Hannan
