**Subject:** Highway 413 Environmental Assessment

**Sensitivity:** Normal

---

Dear Minister Wilkinson

I write to express my deep dismay at the plans for another superhighway, Highway 413, and to ask the Federal Government of Canada to initiate a fulsome environmental assessment of this project.

Being the steward of Canada's Climate Change response, you must know that reaching our targets is about more than reducing greenhouse gases. It's also about preserving habitat. It's about preserving wetlands, like the Holland Marsh, to clean our groundwater and maintain biodiversity. It's about building smarter communities where car travel is not the primary mode of transportation.

You are in a particular position of influence to help Canada act as though environmental health is truly a priority. Please take all necessary measures to bring about a federal environmental assessment of the area impacted by this imprudent Highway 413 proposal.

truly,  
Mary McNamara
