---

Good day

Please issue a federal environmental assessment of the Holland Marsh

Doug Ford is trying to ruin the land and destroy the marsh by putting a highway through.

This will decimate the land and the animals who reside there- this will pollute the breeding grounds of the Northern Pike and likely decimate the Louisiana Waterthrush. Its numbers are down to just five hundred in Canada. This species is vulnerable to the polluted storm water the Holland Marsh Expressway would generate.

Please help and issue the assessment

Kind regards,

Carol LaPointe
