

Request for Federal Environmental Impact Assessment

The CP Don Branch is uniquely situated, touching, and connecting key features of Toronto's history, such as the 11,000-year-old Anishinaabe Trail and the 4,000-year-old Withrow archaeological site.

Metrolinx proposes to construct a three diesel-train layover and maintenance facility in the Don Valley Park.

This will include parking, roads and fuel storage along the Don River and the north/south wildlife corridor.

This will entail the destruction of trees and other flora and a disruption to wildlife and the environment.

We, the undersigned, are requesting that the federal government conduct a Federal Environmental Impact Assessment that evaluates Metrolinx's plan for a layover facility in the Don Valley Park.
