Re. **April 16<sup>th</sup> Online Workshop on Upper Beaver Project  
Lack of Notice to IAA Participants**

As we presume Agnico Eagle is still aware, Northwatch has an identified interest in the Upper Beaver Project and we have participated in the planning stages of the impact assessment and received emails directly from Agnico Eagle with respect to the project (as well as being on a more general email distribution list through which we receive frequent emails from Agnico Eagle).

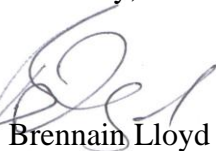

On the following page are scanned images of a flyer inviting participation in an April 16<sup>th</sup> workshop which the flyer describes as being part of the Upper Beaver Impact Assessment. However, we find no notice of this workshop on the IAA registry for the Upper Beaver Project, and we have not received a notice or an invitation to this workshop from Agnico Eagle.

We request the following actions be taken:

1. Agnico Eagle confirms that Northwatch is on the distribution list for notices related to the Upper Beaver Project
2. Agnico Eagle distribute notice of this and other workshops and information events to its full distribution list, including those who have participated in previous sessions with Agnico Eagle and /or the Impact Assessment Agency
3. Notice of this session be placed on the registry, and Agnico Eagle make a request of the Agency to distribute notice of the workshop to the Agency's list of interested parties.

Thank you for your attention and action.

Sincerely,

Brennain Lloyd  
Northwatch

UPPER BEAVER  
PROJECT

Upper Beaver Project  
Impact Assessment

## Join us for a Virtual Workshop

On topics related to the  
**Atmosphere**

Meet the experts, get the  
latest information, and share  
your feedback!

April 16, 2025

6:00 p.m. to  
8:30 p.m.

Online via  
Zoom

### Featured topics

In this workshop, we'll discuss  
the potential impacts of the  
project related to the  
**atmosphere**, including:

 **Noise**

 **Air quality**

 **Vibration**

 **Ambient light**

We'll also cover **proposed  
monitoring and mitigation  
measures** to address and  
reduce potential impacts.

UPPER BEAVER  
PROJECT

### More workshops to come

This is the first workshop in a series.  
Stay tuned for upcoming workshops  
on **Water** and **Land Use**!

### Why attend?

Your feedback will help shape the  
**Impact Statement** that will be  
submitted to the Impact  
Assessment Agency of Canada  
(IAAC).

To register, **scan this QR  
code.**
