How this was extracted. The header was read from the original message as received in the Gmail account <email address removed> , using the "Show original" view, which displays the full header. The Boréalis display names and addresses above are reproduced exactly as they appear, in the order they appear in the Cc field. Many email programs display only the addresses, not the display names. The names and email addresses of residents and other private individuals have been redacted for privacy; the Agnico Eagle staff recipients are counted but not listed. The full, unredacted original can be provided to the Agency on request.

What this extract does not show. It shows how Agnico Eagle's correspondence addressed these Boréalis records. It does not show what the records contain or how they are used inside the Boréalis system, which remains unknown to the author.
