<b>Comment #:</b>	<b>Page #:</b>	<b>Section:</b>	<b>Original:</b>	<b>Suggested Amendment:</b>
ISC-01	31	22.0 Impacts to Indigenous Health, Social and Economic Conditions	<p>“The Project is expected to have minimal effects on the health, social and economic conditions of Indigenous peoples of Canada. The Blood Tribe/Kainai First Nation expressed no concerns with the Project and requested to be included in the list of bidders for contractor work on the Project. A letter from the Métis Nation of Alberta (Region 3) stated that they have no outstanding concerns with Phase 1 of the Project. The MD of Taber will include any Indigenous groups who express interest on the contractor bidding list for the Project.”</p>	<p>Acknowledgement of contracting opportunities is beneficial. However, it would be good to expand on any training and employment opportunities that may be offered during the construction and maintenance of the proposed Project.</p> <p>I.e., will the Proponent provide training and employment opportunities to Indigenous peoples? Have communities expressed interest in this?</p> <p>It would also be beneficial to outline community interest in table format similar to <i>Table 13.1</i>. on page 15.</p>
