### Federal Authority Advice Record: Designation Request under IAA

Response due by **July 21, 2022**

Snake Lake Reservoir Expansion Project

Department/Agency	Fisheries and Oceans Canada
Lead Contact	Rick Kiriluk, A/Team Leader, Triage and Planning
Full Address	867 Lakeshore Road, Burlington, ON L7S 1A1
Email	<a href="mailto:rick.kiriluk@dfo-mpo.gc.ca">rick.kiriluk@dfo-mpo.gc.ca</a>
Telephone	289-230-1327
Alternate Departmental Contact	Deborah Silver, <a href="mailto:deborah.silver@dfo-mpo.gc.ca">deborah.silver@dfo-mpo.gc.ca</a> , 365-323-0247 Amanda Conway, <a href="mailto:amanda.conway@dfo-mpo.gc.ca">amanda.conway@dfo-mpo.gc.ca</a> , 289-556-8651

- 
1. Has your department or agency considered whether it has an interest in the Project; exercised a power or performed a duty or function under any Act of Parliament in relation to the Project; or taken any course of action (including provision of financial assistance) that would allow the Project to proceed in whole or in part?

Fisheries and Oceans Canada (DFO) has determined that we may have a regulatory role with this project. DFO has not yet exercised a power or performed a duty or function in relation to the Project or taken any course of action (including provision of financial assistance) that would allow the Project to proceed in whole or in part.

- 
2. Is it probable that your department or agency may be required to exercise a power or perform a duty or function related to the Project to enable it to proceed?

If yes, specify that power, duty or function and its legislative source.

A *Fisheries Act* paragraph 35(2)(b) Authorization will be required if the project is likely to cause the harmful alteration, disruption, or destruction to fish habitat and/or a *Fisheries Act* paragraph 34.4(2)(b) Authorization if the project is likely to result in the death of fish.

DFO also reviews projects for effects to listed aquatic species at risk, any part of their critical habitat or the residences of their individuals in a manner which is prohibited under sections 32, 33 and subsection 58(1) of the *Species at Risk Act*. It is unlikely that a permit will be required under the *Species at Risk Act* as there are currently no aquatic Species At Risk mapped for the project area as defined by this designation request.

---

3. If your department or agency will exercise a power or perform a duty or function under any Act of Parliament in relation to the Project, will it involve public and Indigenous consultation?

Specify as appropriate.

Should DFO consider issuing a *Fisheries Act* s.34.4(2)(b) and/or 35(2)(b) authorization for the project, consultation with Indigenous groups would be undertaken.

---

4. Is your department or agency in possession of specialist or expert information or knowledge that may be relevant to any potential adverse effects within federal jurisdiction caused by the Project or adverse direct or incidental effects stemming from the Project?

Specify as appropriate.

DFO can provide specialist or expert information or knowledge on assessment of impacts on fish and fish habitat. The Department may provide information to the proponent in order to avoid and mitigate the negative impacts of the proposed works, undertakings or activities. DFO will be able to evaluate the potential implications to our mandate as more details on the proposed project activities become available and are provided to DFO as part of the review process.

---

5. Has your department or agency had previous contact or involvement with the proponent or other parties in relation to the Project?

Provide an overview of the information or advice exchanged.

DFO has not had any previous contact or involvement with the proponent or other parties in relation to the Project.

---

6. From the perspective of the mandate and area(s) of expertise of your department or agency, does the Project have the potential to cause adverse effects within federal jurisdiction or adverse direct or incidental effects as described in section 2 of IAA? Could any of those effects be managed through legislative or regulatory mechanisms administered by your department or agency? If a licence, permit, authorization or approval may be issued, could it include conditions in relation to those effects?

Specify as appropriate.

DFO has reviewed the project information available at this time. There is insufficient information to determine whether the project will result in adverse effects; however, a project of this nature has the potential to result in the harmful alteration, disruption or destruction of fish habitat and/or the death of fish. As such, the project may require authorization under the *Fisheries Act*. If an authorization were to be issued, it would include conditions in relation to the aforementioned effects.

---

7. Does your department or agency have a program or additional authority that may be relevant and could be considered as a potential solution to concerns expressed about the Project? In particular, the following issues have been raised by the requestor:

- effects to fish and fish habitat;
- adverse effects on migratory birds and species at risk and their critical habitat. Special concern species at risk that may be affected includes Great Plains Toad and Northern Leopard Frog. Threatened species at risk that may be affected includes Thick-Billed McCown's Longspur, Tiny Cryptantha, and Rocky Mountain Sculpin. Endangered species at risk that may be affected includes Burrowing Owl, Greater Short-horned Lizard, and Lake Sturgeon (Endangered status under COSEWIC). Other species at risk that may be affected are noted in Appendix 1 of the Request for Designation;
- changes to the environment on federal lands, including reserve lands and Canadian Forces Base Suffield;
- changes to the environment that occur in a province or territory other than the one where the Project is taking place, including Saskatchewan;
- changes to the environment that occur outside of Canada;
- contribution to climate change due to greenhouse gas emissions and loss of carbon storage capacity by converting native grasslands to irrigated agricultural lands;

- changes to the environment that could affect the Indigenous peoples of Canada; and,
- changes occurring to the health, social, or economic conditions of the Indigenous peoples of Canada.

If yes, please specify the program or authority.

The Fish and Fish Habitat Protection Program of DFO reviews projects for their impacts to fish and fish habitat and aquatic species at risk, by ensuring compliance with the *Fisheries Act* and *Species at Risk Act*. Through this program, DFO may provide information to the proponent in order to avoid and mitigate the negative impacts of the proposed works.

---

8. Does your department or agency have information about the interests of Indigenous groups in the vicinity of the Project; the exercise of their rights protected by section 35 of the *Constitution Act, 1982*; and/or any consultation and accommodation undertaken, underway, or anticipated to address adverse impacts to the section 35 rights of the Indigenous groups?

If yes, please specify.

If a *Fisheries Act* Authorization is required, the authorization process through the Fish and Fish Habitat Protection Program may involve Indigenous consultation. This consultation may include consultation and/or accommodation on potential impacts to Indigenous peoples of Canada. These potential impacts may include current use of lands and resources for traditional purposes, physical and cultural heritage, and/or any structure site or thing that is of historical, archaeological, paleontological or architectural significance.

When making a decision under the *Fisheries Act*, the Minister shall consider any adverse effects that the decision may have on the rights of the Indigenous peoples of Canada recognized and affirmed by section 35 of the *Constitution Act, 1982*.

---

9. If your department has guidance material that would be helpful to the proponent or the Agency, please include these as attachments or hyperlinks in your response.
