Subject: RE: Request 2 of 3: IAAC Request for input, designation request for Snake Lake Reservoir Expansion Project. Due by May 12, 2022

Hi Andy,

Canadian Forces Base Suffield located in mixed grassland ecoregion of the prairies is nowhere near the irrigation project and we would not be impacted.

I provided the Enclosure 2 FAAR Form Snake Lake Reservoir Project for the following potential information.

- a. the Critical Habitat Recovery Strategies applicable to CFB Suffield and gazette via MOE are publicly available.
- b. the CFB Suffield Species At Risk Work Plans already shared with ECCC CWS could be made available, as required; and
- c. the conservation efforts in relation with the CFB Suffield NWA Strategy could be made available for consideration, as required.

Thank you

Mr. Danny Laganière, CD, B.Sc., EP

Base Environmental Officer, CFB Suffield
