[Note: The following text was submitted by 2,611 individuals (identified in the tables on pages 2 and 18) to the Impact Assessment Agency of Canada]

Subject: New polluting gas plant requires a FULL assessment

Dear Impact Assessment Agency,

I'm writing to communicate my concerns regarding the proposed new gas plant in Ontario, the so-called "Hydrogen Ready Power Plant" south of Sarnia, and ask you to conduct a full assessment (with a Review Panel) on the project. This is necessary because:

- 1. Ontario is not on track to meet its own weak greenhouse gas emissions targets. Adding gas plants to the electricity grid will make it even more difficult for Ontario to do its fair share to bring down Canada's emissions in line with the Paris Agreement.
- 2. Burning fossil gas accounts for one-third of all carbon emissions in Ontario and gas plant pollution is rapidly increasing. With Ontario's plan to continue to increase the use of gas-powered electricity, greenhouse gas emissions from Ontario's gas plants are set to skyrocket by almost 400 per cent by 2030 and by more than 600 per cent by 2040 (compared to the 2017 level).
- 3. Ontario and Canada can and must transition to renewable electricity grids. Ontario's phase-out of coal plants led to declining emissions between 2005 and 2017. After achieving such a success and with so many renewable energy and storage options available, it is unthinkable for Ontario and Canada to be investing in dirty gas plants.
- 4. The gas plant would undermine a clean electricity standard (CES). The federal government has committed to a net-zero electricity supply by 2035 through its clean electricity standard. The federal government must start acting now to ensure new gas plants do not go online while details of the CES are being developed. Provinces need clear direction and guidance to move towards a renewable electricity system now.
- 5. "Hydrogen ready" doesn't mean anything. Calling a plant "hydrogen ready" does not mean that hydrogen will be used at any point in the plant's life, nor does it mean that the hydrogen production process used will be green. It appears this plant plans to use "blue" hydrogen, using natural gas for its production. 96% of hydrogen is developed from fossil fuels and produces even more carbon pollution than a regular gas plant.

For these important reasons I urge your Agency and the Federal government to examine this project in detail to ensure Canada and Ontario are on the right path to address runaway climate change.

Table 2

Name:	Unique Comment:
	We need to heal the Earth from what humans have already done to
	choke and pollute our lands and waters. We are supposed to lower toxic
Ada Lockridge	emissions not add more.
Adam Maxwell	Bastards
	I am very concerned this is a short cited move and we need to make sure
	Ontario is developing clean energy for the future. As a voter, thank you
Adrian Walrath	for considering this issue. Adrian
Alain Jegen	Look FORWARD ONTARIO
Alan Lobo	Stop this nonsense we need to save our environment
	Climate Change and attendant problems of lack of biodiversity, growing
	human numbers, increasing drought and floods, wildfires, and especially
	vanishing glaciers and meting permafrost and clathrates, are perils that
	we have ignored for 50 years as the CO2 levels have risen exponentially.
	Renewable energy, and NOT the burning of fossil fuels is the only way to
	a long-term remedy. Alan Morgan, Ph.D., (Former, Global Change
Alan Morgan	coordinator, Geological Survey of Canada).
	We need clean energy. We are in a climate crisis. Please wake up and
Alexandra F.	don't build new gaz plants.
	I'm curious what the canceled (at a loss pre-completion) green energy
	projects could have accomplished. As the conservative parry refused to
	commit to its platform and refused to make itself available during
	campaigns to be questioned by rhe public and debated by opponents I
	believe the conservative government has misrepresented itself to the
	public and does not have a mandate for fossil fuel energy (at a time
	when it is most costly to preserve private profits). This is another
	example of the conservative government being penny wise and pound
Alexis Godard	foolish and negligent from a long term climate change perspective
	If not now, when? We cannot keep delaying the inevitable and tarnishing
	the futures of next generations by not making needed sacrifices today.
Alicia Dinar	It's time to start making necessary changes.
	Please just listen to the logic in our asking for clean air and a phase out of
	fossil fuels. There is no need or room for this plant in our current climate
	crisis. We are out of time and far past the relevance of a gas plant. Be the
	difference we so desperately need right now and say No to this new plant
Allison Millman	in Ontario. Thank you.
Alyssa Scanga	Frankly, it is disturbing we are still debating this in 2022.
	Hello, I hope you are well. I'm reaching out about the new Gas plant in St.
	Clair. I would like to express my concern with this new plant as from my
	knowledge it can result in negative health impacts to surrounding
	communities. I think this type of electricity source should be phasing out
Amanda Armstrong	and more renewable sources sought after. If you have more information

	about this project I would love to hear about it. Thank you for your time,
	Amanda It's appalling that in 2022 the government is planning on building more
Amanda Hamilton	gas plants.
Amelia Kahn	No to new gas plant in Ontario
/ Incha Raini	We need to stop pollution and take care of our environment! No more
Amy Deng	power plants!
Andre Sigouin	Instead of reneging on your commitments to reduce emissions, your government should push to increase the necessary infrastructure to import electricity from Quebec. Think ahead not only environmentally, but politically.
Andrea Balsara	This government has ignored climate science in the past and is still ignoring it, to the peril of Ontario. We need immediate and effective action to combat climate change, not ADD to the problem. Do not allow this unscientific approach to dealing with the energy situation to take us further into the climate crisis. We need CLEAN energy options, and we need to grow our green economy. We need responsible leadership that guides us safely into the future.
	I am personally horrified that Ontario would even consider a new gas plant given the urgent need to reduce our reliance on fossil fuels. Even if it is "hydrogen ready" there are a lot of questions around whether hydrogen itself is a green energy source, given the limited capacity to manufacture it in a carbon neutral manner. This plant should never be allowed and instead the costs should go into renewables and energy
Andrew Hampton	efficiency initiatives.
Andrew Young	Stop adding more combustion energy and start ramping up renewable energy, Solar, Wind, Hydro, Battery Storage, GeoThermal, energy reduction incentives so we stop using as much energy. Burning more gas and oil is not what we should be doing in 2022 and you know it.
Angela Leach	I would like to add that due to uncertainty of the political forces pressuring the world economy volatile markets for natural gas and the soon to become short-term sustainability of fossil fuel make it a poor choice for a power plant. Better to embrace green energy which over the long term is cost effective and non-polluting.
Angie Reemeyer	I want to see my tax dollars go towards clean energy, not dirty energy.
Anita Payne	We need to go ahead with clean energy projects, like solar and wind and develop storage projects as well. We are in a climate emergency. Act like it!
Ann Elliott	Please stop doung a bad things for Ontaio!
Ann Rundle	I cannot urge strongly enough the importance of moving to renewables and/or nuclear at this critical moment in history! Ann Rundle
Anne Carbert	So many Ontarians, like me, are trying to make clean energy choices and electric power has been a good choice in this province because of low-emissions power sources. Gas plants to provide electric power set us back. I feel it undermines my ability to support serious climate action. I am increasing energy efficiency and supporting community efforts to meet climate plan goals but new gas power plants undermine all my

	efforts. Please seriously consider all the many impacts of this
	development.
Anne Dalla Rosa	To the Ontario govt and anyone else pushing these poisonous projects, THINK OF YOUR HEALTH AND THE HEALTH OF YOUR CHILDREN AND OUR SURVIVAL. THESE EGREGIOUS POLICIES CONTRAVENE OUR HUMAN RIGHTS, OUR CONSTITUTIONAL RIGHTS AND ARE THEREFORE CRIMINAL. PHASE OUT GAS PLANTS, PRODUCTION OF GAS, AND ALL FOSSIL FUELS-AND GIVE US A FUTURE WITH CLEAN HEALTHY GOOD VALUE RENEWABLE ENERGY AND OTHER PRODUCTS. NOW. FOR THE SAKE OF SANITY AND OUR WEEL BEING, I
	This must not happen! Doug Ford is a terrible premier. Roads that we
Anne Harrison	don't need. Now gas plants we don't need. No way Fraud.
Anne Learn Sharpe	We have no time to go backwards on greenhouse gas emissions. Any financial benefits will be outweighed by the cost of climate disasters.
Anne-Marie Ambert	We absolutely need more non-polluting infrastructure rather than more pollution for the health of the environment of the province as well as that of citizens.
Annua Cinana a da	Please do not build this plant but move to environmental affirmative solutions for the sake of future generations and life on this planet. WAKE
Annne Simmonds	UP please If we want Ontario to continuously survive and strive, then it's time to
Astrid Hardjana-Large	focus beyond the illusion of immediate wealth.
Barb Robins	STOP the destruction of our precious environment. Professional, non-political Environmental assessment should be an essential requirement prior to any project approval. Regulations and ongoing assessment though-out and following projects to ensure protecting the environment.
Barbara Browne	I'm damn mad at Ford and his recklessness! Barb Ribins Cobourg Wake up, Doug Ford. Stop destroying our world.
Dai Dai a Di Owile	For goodness sake it doesn't take a rocket scientist to know this is just
Barbara Gordon	wrong. Put my money in renewable green energy.
Barbara Taylor	This cannot be the legacy Doug Ford or his MPPs want to leave.
Barbara Wyatt	Again this government shows a lack of understanding around the need for immediate actionwe can't afford to delay change anymore. Our government should be the lead in the climate fight, sadly it is not.
	This is an urgent issue, As a voter, I want to see the Ford government creating alternative energy sources to fight climate change, not create more toxic air. So far no results - is big business always going to win out
Bev Reed	with this government????
	Climate change is more important then fast economic growth. We need to take care of the issues we have instead of making new ones that will ultimately make more expensive issues in need of correcting on the future. We need a long-term solution to climate change and economic growth. I can't we support the planet and create jobs in sectors where
D'a a a Kara	we are doing both, caring for the environment and finding better sources
Bianca Korva	for power.

	In light of the climate crisis, we need sustainable energy generation.
	Burning gas for energy production is needless, foolish, and destructive
Bill Macmurray	when there are many viable zero-emission forms of energy production.
DIII IVIACIIIUITAY	It is possible to build wind turbines that intelligently shut down if their
	shadows would fall on homes, or if bats have been detected in the
	vicinity. I have lived in German very close to 2 wind parks and found
D:II Chamusad	them pleasant. Then again, I find Dutch windmills attractive. Tourist will
Bill Sherwood	come!
	Solar Energy and Wind Turbines are the way to say yes to the
D'II Characad	environment, no to CO2, and actually yes to better education, better
Bill Sherwood	paying jobs and more taxable income!
Brian Blakeley	Don't build this plant in Obtario. Go renewable please!!!
	Ontario should lead the way to adopt green energy. It's the way of the
Brian Leung	future and cheaper for end customers
	It is showing how Canada is failing at even living up to its own ideals of
Brian Sheldon	nationhood.
	Conducting a full assessment, reviewed by a scientifically qualified and
	neutral panel, is the very least you can do. You owe such minimum
	prudent steps to your children and to all Ontario citizens, as responsible
	citizens entrusted with future generations of humans and other-than-
	human beings, given the very dangerous situation Ontario is in and the
Bruna Nota	absence of mitigating factors. PLEASE, do the right thing!
	Ford is sneaky and determined to have things his way. He doesn't care
	about climate change or the environment. We need to stop that kind of
Burke Elaine	thinking.
	It's time to phase out fossil fuel and instead develop environmental
Camile Paradis	friendly initiative.
Carley Noelle	This is absolutely disgusting. What a disgrace.
Carol Anne Hunt	Build wind farms in Lake Huron instead. Carol Anne Hunt
	We are in a Climate Crisis. This is the time to be scaling back the
	production and consumption of fossil fuels! Ontario and Canada cannot
	afford to build another gas plant. The Climate costs are way too high!
	When are we going to realize that Climate mistakes end up costing us
	more in dollars and in wildfires, floods, heatwaves and health
	consequences? We need to go forward in a new direction without
	ramping up fossil fuel production and consumption. We need to stop
Carol Essex	global warming in its tracks while we still can.
	Wake up Ontario!! If only these clowns who really did NOT WIN POWER
	in the past farce of an election, would live up to their self- appointed title
Carol Ritchie	Progressive!!
	This conservative government should be ashamed for not investing in
Carol Spratt	renewable energies! I will not be voting for you in the next election.
Carol Spratt Carole Sisto	
•	renewable energies! I will not be voting for you in the next election. Please don't make this mistake.
•	renewable energies! I will not be voting for you in the next election.

	The future is clean energy! Wind turbines, solar panels, hydro power by
Caroline Van Haeften	the rush of water energies.
Caronic varriacien	This is such a dumb idea. What the hell is dumb doug thinking? And yes I
	did not capitalize your name because you are not a capital person. You
Carolyn Cathcart	are terrible.
	No to any gas plants proposed by this PC government. Ontario should be
Carolyn Hertzberger	moving forward and avoiding any more healthcare concerns.
Carolyn Houlding-	moving for ward and avoiding any more nearlineare contecting.
Braunberger	This is very concerning to me in the wake of the climate emergency
Carolynn Bloomer	Create jobs in renewable energy research and implementation!
Carolyim Bioomer	Ontario needs to take a much firmer stand against the burning of fossil
	fuels. We do not need this plant and our money should not be wasted on
Catherine Pentland	this type of environmental damaging plant!
Catherine rentiand	we need renewable energy sources, not more fossil fuel, if you want your
Chala Hunter	grandkids to have a life at all.
Chris Sibbald	We should buy hydro power from Quebec
Chris Tomsett	Time to buy electricity from Quebec, or go green
Chiris romisett	
	In short, building new gas plants is the wrong direction. There are other
Chris Warrall	renewable and non-carbon solutions - those renewable paths should be
Chris Worrall	our electricity grid focus.
Christina Farnshaw	Please - no new gas plants in Ontario. Climate change is causing a lot of
Christine Earnshaw	damage and we need better, healthier sources of energy.
Chuistin a Lavellan	The climate crisis is real and we just cannot continue as we have. The
Christine Lauffer	time to end using fossil fuels and hydrogen made by fossil fuels is now!
	Please stop this further degradation of our province. Ford's government
	only care about money in their pockets and big business political donors.
	They care nothing about us people and they NEVER listen to our concerns on land and environmental concerns. We really need Federal help to stop
Christine Pearce	Ford's destruction.
Christine Pearce	
	Ontario needs to move away from carbon-producing energy sources. With a climate in crisis, the province needs to embrace renewable/green
	sources of energy: wind, solar, hydro, geothermal, etc. This Ontario
	conservative government is lacking the creativity, ingenuity, and forward
	thinking that is needed to set Ontario (and Canada) on a path of a green
	economy and liveable future. Hopefully, in the end, it will do what is right
	rather than what is easy and expedient, when it comes to meeting
Cindy Allan	Ontario's energy needs.
Ciriuy Allan	Should be investing more into solar power. With the price of fuel being
	so very high, why are you investing more of my tax dollars into something
	that should be discontinued as new energy sources replace it. I can no
	longer afford to live in a way that I did 5 years ago. Not looking forward
	to the winter when heating with gas is going to be far out of my budget
Cindy Timmons	
Cinuy Fillinons	along with everything else. It must be nice to be you.
	We Need to Institute a Thorough Climate Damage Prevention and
	Reduction Plan, Not a Limited Climate Damage or Adaptation Plan.
Clive Apps	Preventing and reducing climate damage through the initiating of
Clive Apps	immediate and wide measures to curb excessive consumption and waste

	hothe established subjective at the collinear of the coll
	by the society is the only solution that will guarantee a good result and a long term future for our society. Society needs to switch to solar/wind/water produced power as much as possible. Wasting effort planning another cleaner version of the problem (fuel burning systems) will still eventually cause a climate that is going to cause our extinction in 50 years or less; if we do not change our systems to eliminate the societal caused environmental damage leading to the problem, is the equivalent to preparing coffins instead of taking the medicine. The excess heat added to the ecosystem from fuel burning power generation systems is causing irrepairable damage to the ecosystem and will eventually lead to a planetary system collapse, which will include the elimination of most of humanity. Burning things to make energy creates heat that eventually the ecosystem must absorb. Switching to other fuels will not solve the problem of excess heat created by combustion released into the ecosystem. Engines are at best 55% efficient (most are below 35%), the rest of the energy is released into the ecosystem. Electric power is 80-95% efficient producing very little waste energy. Water power generation is relatively inert in the effect on the ecosystem, solar is better than water in that regard. https://www.thenational.scot/news/19328319.human-greed-not-controlled-planet-will-destroyed/https://www.thenational.scot/news/19328319.human-greed-not-controlled-planet-will-destroyed/https://www.linkedin.com/pulse/greed-addiction-social-problem-destroying-earth-david-carr-m-a-?trk=read_related_article-card_title https://blog.flexis.com/how-not-to-implement-advanced-planning-and-scheduling
	Hang on a darn minute, who fought against the Liberal parties, new gas
Colin Abbott	plant that was part way through construction.????????
Colin Royce	Get a long term plan for renewables and nuclear and get building
Coline Gardhouse	Renewable energy investments only!
Colleen Glass	This is unscionable, NO MORE GAS PLANTS!
	Approving yet another gas plant here is the wrong move for a net-zero future. Instead, we urgently need actions that help ensure a just, healthy and frankly, less horrific future. Please look to ways to immediately
Colleen Lynch	reduce fossil fuel use and move to renewables (wind, solar) instead. Our government is rarely telling us the truth. The banks are afraid that oil companies will walk away from loans and create a financial crisis while it
Connie Miller	is so much cheaper to have green energy. Always the taxpayers expected to pay so that investor expectations can be met without losses. Province is always a few steps behind the latest and best options.
Consuelo Castillo	I urge you to fund renewables, and drop any and all support for fossil fuels!
Corey Bernard	Don't need more power plants to over charge us
Cynthia Meyer	We in hamilton get SW winds and would be in the path of those toxic fumes. I'm asthmatic. Please don't do this!
•	1

	The Province of Ontario has to start looking a new options to power this
	province. We are in need of real leadership and new ideas. The people of
Dana Degeer	Ontario deserve better than what is being proposed.
	Premier Ford, you need to start taking care of all Ontarians and our
	future. Your latest proposal is worsening, not reducing the impact on
Dana Turnham	climate change. This must stop now!
Daniella Niddery	No new gas plants please
Danielle Reid	This investment is both fiscally and environmentally destructive.
Danny Berg	Phase out not build more fossil fuel capacity!
Darren Graham	No gas plants
David Berofe	natural gas is not natural!
	This proposal is all about making money and very little else. Trying to
	make it appear to be environmentally acceptable by burning hydrogen is
	greenwashing at its worse. If there is a clean source of hydrogen available
	(i.e. not derived from natural gas), it should be diverted to transportation
	purposes to displace the carbon based fuels. Natural gas fired turbines
	used for power generation are notorious emitters of nitric oxides as well
	as oxides of carbon. This is obvious each time the Toronto Based
	Portlands Energy Centre fires up a gas turbine and thick orange coloured
	nitrous oxide gases are released. There are better alternatives that will
	have less negative impact on our environment and our health while
David Johnston	achieving the same objective.
	renewables are the way forward, but as usual conservatives go
David Kraus	backwards so their friends and supporters can profit
David Shindler	Think about our future!
	If the Ontario government won't listen to reason, the Federal
	government should be asking question on how Ontario expects to meet
	their share of Canada's commitment to clean energy. Hydrogen ready
	means nothing. Most of the world's hydrogen is still manufactured from
David Strachan	fuels anyway.
	Ford is going backwards AGAIN. Stop this insanity and work with Quebec
	for electricity for heavens sake, what is it going to take for all you old
Dawn Brennan	cronies to get into the 20th century????
Dean Orr	100% of Ontario's electricity should be from renewable energy!
	We are already suffering from too much carbon in the atmosphere.
	Reducing emissions now only reduces the problem. But at least this is an
	option. The poor, the marginalized and the natural world will all suffer
Dean Whalen	disproportionately due to the decision to increase carbon emissions.
	We can't meet our climate change targets as a province or country by
	building more polluting facilities. No green-washing! We don't have the
	Hydrogen ready to use- stop misinforming the public. Invest in green
Deb Mccloskey	energy solutions instead.
	Don't let the environment take a back seat once again. This time could be
Debbie Hill	the last time.
	I find it a disgusting violation of my rights to rush into something so
Debbie Mcilwee	devastating to our environment. Stop this madness!!!!
Debbie Rodgers	\W e need something better for the environment

Debbie Ross	No more gas plants Mr. Ford!
Debi Mohan	Please use alternate energy sources like solar or wind!
	WHY CAN'T WE SPEND THE MONEY ON GREEN ENERGY RATHER THAN
	MORE POLLUTION? THE ENVIRONMENT IS OUR MOST IMPORTANT ISSUE
	AND THE FORD GOVERNMENT DOESN'T SEEM TO CARE ABOUT THE
	FUTURE AT ALL, WHAT IS IT TO YOUMORE MONEY IS THE ONLY THING
	THAT IS IMPORTANT??NOT THE FUTURE FOR OUR KIDS AND
	GRANDKIDS AS OUR PARENTS FOUGHT IN WAR TO GIVE US A SAFE PLACE
Deborah A. Beatty	TO LIVE. WHY DON'T WE CARE ABOUT THE FUTURE?????
Deborativa Beatty	Public safety demands a COMPLETE and FULSOME impact assessment of
	the operation and emissions of this gas plant project (due diligence), so
	that citizens are properly informed and protected. Nothing less is
Deborah Cherry	acceptable.
Description of the try	It is time to stop burning fossil fuels in Ontario. We have gas power plant
Deborah Gordon	now in the Holland Marsh never running.
Deborah Klassen	Breathing clean air is important.
Deporturi Masseri	Ontario needs to move in the right direction with 21rst Century energy
	sources that are not fossil fuel based. Gas plants are not the answer. I am
	disgusted and embarrassed by the Ford government's lack of
Deborah Pearson	understanding.
Deporturi curson	ONTARIANS DON'T WANT FOSSIL FUELS!!! STOP FORCING THESE FILTHY
	PLANTS ON US AND START LISTENING TO WHAT VOTERS WANT - GREEN,
	RENEWABLE ENERGY!!! SHAME ON THE FORD GOVERNMENT AND THEIR
	CORRUPT SUPPORTERS FOR CONTINUING TO GIVE HANDOUTS TO
Debra Clinton	WEALTHY DONORS INSTEAD OF DOING WHAT THE VOTERS WANT!!!
Debra Cimtori	Why not using the electricity from Quebec to produce Hydrogen instead
	again depend on gas that cause environment problem??? What are you
Deni Cavanagh	not getting people with decision power?
Dem cavanagn	No need for a long letter - Ford won't listen anyway - stop being stupid by
Dennis Fox	not using fossil fuels.
Dennis O'farrell	New fossil fuel infrastructure is so wrong in the face of the climate crisis.
2 0 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	We cannot create projects that will lock us into fossil fuel use for
	decades. Doesn't Sarnia have enough air pollution without adding more?
	This project is a public health and climate disaster in the making. I have
Despina Melohe	read this article and agree with every word.
	I know nuclear isn't ideal, but I think it's necessary in the medium term to
	stop gas from taking over. I would take nuclear over gas but ideally we
	should be building wind/solar/grid scale energy storage to account for
Devin Arthur	the loss in Pickering.
	I am opposed to any new gas plants for Ontario. We are actually facing a
	climate emergency now. Specifically I am opposed to the latest proposal
	for a new gas plant, known as a "Hydrogen Ready Power Plant" to be
	located in the Township of St. Clair, south of Sarnia. Ontario is not on
	track to meet its own weak greenhouse gas emissions targets. Adding gas
	plants to the electricity grid will make it even more difficult for Ontario to
Diana Gibbs	do its fair share to bring down Canada's emissions in line with the Paris
	20 .55 .66. Share to shing down canada 5 chilosoftis in line with the land

	Agreement. I support the plan to achieve net zero put forward by the
	Ontario clean air alliance. Thank you, Diana Gibbs
Diane Ferguson	Time to move forward, not backward.
Dianne Cobb	I do not favor this proposal. at all.
	Amen to the letter above. It describes the situation precisely. Ford's
	government is carrying on with its habit about exacerbating, rather than
	diminishing climate change. Also it's using "slight of hand" as usual by
	naming this new facility "hydrogen ready". As stated above this is
	misleading in the extreme and could trick a somewhat uninformed
	person into supporting something that does not deserve support. Either
Diamas Falsask	Mr Ford is either unaware of relevant science, or he doesn't care about
Dianne Fahselt	the future of the planet (including his own family).
Dilin Baker	Pay attention to climate for our children
	This plan will more than offset all the benefits and negate the investment in transforming Ontario steel plants. We need a solution to pollution so
Dinah Robinson	we can adapt as the climate changes.
Donald Ross	#climateactionnow
Donna Deneault	NO MORE GAS PLANTS
Donna Martinello	We should absolutely be phasing out gas plants.
Doyle & Lori Penner Prier	What are you doing Ontario Government?
	The previous Liberal Government cancelled plans to build a gas-fired
	electricity plant for good reasons and received much criticism from
	then MPPs from your party. Calling this "hydrogen ready" is an attempt
	to greenwash these plans. We cannot build any new gas-fired generators.
	And we nave to close any that still exist. No matter what we call them.
Eileen Shannon	Their carbon footprint is too great. The Power Workers Union knows
Elleeli Shannon	this and so do you. Refuse this proposal. For the sake of the next generation please do not invest our tax dollars in
Eleanor Mcknight	another fossil fuel enterprise. Go green!
	As Ontarians, we need to start going in the right direction on the climate
	change agenda. Putting in more gas-fired plants is not the right thing to
	do. The only "ready" that is acceptable is "green-power ready" - so why
Elizabeth (Beth) Doubt	not do this directly.
	First the continuation of 413 and now this. Doug Ford clearly has his head
	in the sand when it comes to making decisions that contribute to our
	worsening climate crisis. Good leadership seeks sustainable solutions, not
Elizabeth Forrest	backward steps. Elizabeth
Ellen Manney	People who live in Ontario need positive climate emergency solutions!!! NOT another gas plant! A BAD IDEA!!!!
Elleli Mailley	As a resident of Ontario, I vehemently urge the Ontario government to
	do a full environmental assessment before moving forward with a new
Ellen Morris	gas plant. We are in a climate emergency that cannot be ignored.
	not sure what "action" you're asking for? if signing this to join call for full
Ellen Tolmie	impact assessment, OK!
	We are in the middle of a climate emergency. The Ontario government
	needs to be investing in emissions reductions not building more polluting
Emily Hood	energy plants!

	The air pollution in parts of Ontario is already abysmal, this is only going
	to make things worse. The government should be investing in energy
Erika Mias	solutions that decrease emissions, not add to it!
	Time for some brave leadership! We want local, reliable, clean energy for
	our communities. Don't invest our taxes, our shared wealth, in more
	fossil fuel infrastructure. Renewables are a better investment! It's not
Fatima Crerar	complicated! It's exciting!
Fiona Bladon	What does hydrogen ready mean? How is the hydrogen extracted?
Tiona Bladon	The news from here and around the world is frightening, stressful and
	depressing with temperatures highest ever, heat domes, droughts,
	floods, and food shortages. On top of that we're dealing with pollutants
	in the air, soil and water, and with the fact that Canada is not set to meet
	the Paris targets on fossil fuel reduction. A new natural gas plant is going
Franca De Angelis	the wrong way. We need to stop and reduce on all fronts.
	The Ford-led government is totally irresponsible regarding the health of
	the residents of Ontario. The ongoing use of gas will further destroy the
Frances Arbour	environment with the negative effects on our health.
	For Canada to reach zero emissions by 2050, Ontario needs to phase out
Frank Pasquill	dirty fossil gas.
	My hope is that Canadians recognize the catastrophic dangers of climate
	change, the small window humans have to reduce greenhouse gas
	emissions, and that we work together. Therefore, let me know how this
	project can even be considered by your government. We have safer
	green projects that can be developed and provide much greater payback
	evironmentally, socially, economically and politically Be bold, visionary,
Gail Schenk	wise and courageous. Choose the green option.
Gall Schenk	
	We need to take our climate commitments seriously and not squander
	the gains we have made in emissions reductions from Ontario's electric
Gareth Lind	grid.
	I am a physician and environmentalist and know that we heading in the
	wrong direction when we increase the consumption of carbon derived
	fuels. Global warming is the biggest public health disaster in the history
	of humanity. Daily urgent steps are required to reduce the coming
Gary Burrows	carnage.
	Amazing how a provincial government elected by only 18% of its eligible
Gary Champagne	voters gets to acts so stupidly.
	The Ontario government is tone deaf when it comes to the urgency of
	the climate crisis and need to cut carbon emissions now! Building more
	fossil fuel infrastructure that will last for decades is foolhardy and
	dangerous given the severe and frequent climate-related effects that
	we're already experiencing in this country. I urge the IAAC to require a
Gary Markotich	federal impact assessment for this proposed gas plant.
Gary Iviai KULICII	
	Does no MP have grandchildren? Or is this a quick fix for some who
	wants to make instant profit with no thoughts for the future? Just in case
0 ""	you missed it the climate crisis has begun and greenwashing anything
Geoff Day	that uses any natural gas will still make the crisis worse. If this plant is

	truly clean then having a full accomment should not be an issue Marie
	truly clean then having a full assessment should not be an issue. Very disappointed Canadian, Geoff
	The provincial government's only policy is to further big business who
	they support and who supports them. They care nothing about the
Geoff Dunlop	environment or the people.
GCOIT BUTTOP	Regarding renewables. Nuclear Power plants are the best option at the
	moment that is available to rapidly decarbonize our society's energy
	production methods. Natural gas is not 'clean' as the word 'natural'
	implies and is an obvious assault and danger to the health of the citizens
	of Ontario. It is also an attack on all the other lifeforms that support us
	and make the biodiversity that we depend on possible. Please stop
	thinking only of the so-called gross domestic product which is grossly
	inadequate as a description for what is truly important which is the
	health and well-being of our natural environment which we are supposed
	to be passing down to future generations. Please re-organize your
George Olenick	priorities!
	NO more gas plant generating GHG emmissions, we need clean energy,
Gerard Dusastre	to reduce GHG emissions and to mitigate climate change.
	Personally, I am old, my time is growing short, I have lived a charmed life
	and quite frankly I don't give a damn but I find it depressing to think that
	we might destroy ourselves when we are on the verge of escaping the
	planet and the egomaniacs among us can sally forth to rape and pillage
	an infinite universe trying to prove their superiority to each other and to
Gill Fisher	we the children of a lesser god.
CIU: T.U	What is the matter with this Conservative government that ignores
Gillian Toll	science and our future.
Ginny Pearce	Is it really hydrogen ready full assessment is imperative.
	We are in a climate emergency. Natural Gas as an energy source is profoundly wrong. I live in Grey County where many new developments
Gord Edwards	are proceeding. Almost all using natural gas to heat and cool!
Gord Edwards	More gas plants are counter-productive in reducing atmospheric carbon
Graham Jordan	and CO2.
	Please recognize the urgent need to combat climate change by reducing
	burning of fossil fuels. Hydrogen is not a solution and the infrastructure
Graham Macdonald	to produce and deliver it is decades away.
	It would appear that our governments don't care about what the people
	say. The people of Sarnia I'm sure do not want another plant polluting
	their air causing more illness to death. Now the issue, of course, is that
	you have parties that have slightly different agendas, but not when it
	comes to oil and gas. And the conservatives are not concerned with
	climate change, and that is obvious. The liberals want us to believe that
	allowing more pipelines and plants, etc will somehow get us to a
	greener pasture. Maybe they think, "Oh, we have until 2030 or 2050,
	we're good." And it doesn't matter how many experts tell them to
	transition off fossil fuels, now. As consumers, most of us know and care
	that transitioning is not an overnight thing, but adding more "fuel" to the
Greg Hanson	fire will not get us there any faster.

Greg Taylor	Hey Doug, I realize you didn't finish college, so you probably don't know much about climate science. As such, I'll keep it simple: The planet is warming, humans burning fossil fuels are responsible, the consequences are dire, so we must stop doing it. This means NO NEW GAS PLANTS IN THE PROVINCE!
Gretta Vosper	It is time to look in the direction of the future rather than building on a failing legacy of the past.
Gwendolyn Gail Stenersen	During a climate crisis that can & unless aggressively dealt with, will put an end to many species, food crops, clean air, water, etc., the LAST thing we need in this province is another gas plant. If you could see through the cash that donors are willing to shower on you, you may be able to realize what is of importance on our planet, this country, this province! Please have compassion for others sharing this province & DO NOT add another gas plant. There is no argument that would make this even close to an acceptable idea!
Hanny Simo	No to gas plants, no to pollution!
Heather Donaldson	This gas plant is just plain wrong. Don't build it.
Heather Ross	#climateactionnow
Heide Shrouder	When will we ever learn? Have we not done enough damague alraeady? Must we go the way of the Easter Islanders?
Helen Hansen	Say no to nukes too - conservation is the answer - better siting of new buildings, stronger building standards, encouragement to use solar collectors, etc. I live 50 km from 5 nuclear power plants on L Huron
Helen Mcgrath	No more gas plants
Hilary Henley	ridiculous!
Hilary Wear Hilda Adams	I don't see how anyone can believe Doug Ford will listen to anyone he
Hilde Reis-Smart	sure isn't listening about highway 413 but I agree with the gas plant This is the WRONG way to go! Carbon released to build the plant and then spewing more CO2 from the burning of the fuel. This is NOT going to reduce our emissions. Our kids and their kids will pay for this.
Howard Russo	Wow! Only 18% of Ontario voters voted for Conservatives and now you think that gives you a mandate to further destroy our environment. What utter disregard for the will of the people you supposedly represent. Disgusting!!!
Hugh Donnelly	Another gas plant is a bad idea. We need to move AWAY FROM dependency on fossil fuels.
Trugit Domietry	When Ford cancelled all those green initiatives when he first got his hands on the reins of power, there would be ramifications. Now with several nuclear plants coming off line, the ramping up of gas plants is inevitable. his re-election condemns Ontario to less safe future. Thanks
Ian Campbell	Doug.
Ian Macintosh	Part of the impact assessment should include a look back at what might have been if the green energy act had not been meddled with.
Ian Paterson	WAKE UP
Ingrid Kern	The Ford government cancelled over 600 renewable Energy projects that were already being built. Now they're trying to build more greenhouse-

	gas spewing facilities. Let's stop this latest Gas plant, and turn to
	renewables, and cheaper electricity from Q
Irene Kaye	We don't need more fossil gas plants!
Jacklin Weatherill	Use clean energy
James And Sharon	Osc dealt chargy
Bradley	The last thing we need is equipment that produces more chemical gases
James Evel	Mr. Ford please get serious about climate change now.
	This is a totally sham! Build a hydrogen power plant! Do not build a
	natural gas plant and call it a hydrogen Reddy plant, this is more
James Pronk	government BS!
	Opposing natural gas as an electricity generator is not a sound
	environmental strategy. Gas turbines spool up quickly to take up load
	during surges in demand and when PV and wind supply is low. I don't
James Reym	oppose the gas plant.
	It is madness to build any new fossil fueled energy plants. A new plant
	will soon be obsolete as full carbon pricing takes effect, making it
L E I	uneconomical to operate. What is your problem with investing in clean
Jane Fogal	energy?
	Please reconsider the plans for a new gas plant. Whatever plans are put forth we need to be conscious of the impact on the environment and the
Jane Liddell	health and future generations.
Janis Rapoport	STOP! RECONSIDER! CANCEL NOW!
запіз Каророгс	It's hard to believe the government is planning to revert back to gas. So
Jean Faber	short sighted given all the facts about climate change.
Jeanette Clark	Ontario government on the wrong side of history.
	i HOLD OUT LITTLE HOPE THAT THIS PETITION WILL MAKE ANY
	DIFFERENCE AT ALL, BUT I MUST AT LEAST TRY TO DO ALL I CAN TO
Jen Ackerman	PRVENT ANOTHER STUPID HUMAN MISTAKE FROM TAKING PLACE
	Please invest more in renewables. We are running out of time to reduce
Jennifer Harris	the damage climate change is already having on the earth.
Jennifer Hook	Please grow green energy instead.
	It doesn't make sense to try to shift the population to electric cars and
	then use gas to supply electricity! The world is running out of reasonably
Jennifer Shahi	accessible fossil fuel supplies.
lawi lawaat	How can you burn more fossil fuels? Look at our tornadoes, floods, and
Jerri Jerreat	heat waves! This is our home. We must save it.
Jerry Black	This was not mentioned in the recent election - now I see why Please move into Reality's future. The earth will be unable to support
	human life if we do not stop burning fossil fuels. Invest in the future. Stop
	trying to sustain the past. For the sake of our children and grandchildren,
Jim Ellis	PLEASE!
- ·· -··-	Mr. Ford How much money comes to you if the Gas plant is another one
Jo Cryderman	of your "projects"?
Jo Hayward-Haines	Is there a shred of sanity in this plan for a gas plant in 2022??
•	It's time for this government to take some responsibility with respect to
Joan Flye	climate change. The response so far has been disgraceful!
Joan Mclaughlin	Stop this insanity do what science supports

Joan Strack	NO.
	I can't believe the Government is considering this! Haven't recent events
Joan Yearsley	been enough to make them aware of the world we are now living in?
	Although this is a form letter, I am sending it because it expresses my
	views perfectly. I am very concerned about the environmental impact of
Joanne Baker	this proposal.
	Time to stop burning fossil fuels I am against the building of a new gas
Joanne Flinn	plant
	We are teaching our students that their future relies entirely own the
La de Dania d	phasing out of fossil fuels. What should we tell them about their
Jody Berland	government?
Joe Fraser	building more fossil gas plants is going in the wrong direction on energy
	The general public has not been informed about this proposed so called "Hydrogen Ready Power Plant". I learned about it from an email sent to
	me by Environmental Defence. Every citizen of voting age must be
	directly informed about these costly expenditures. This can be done via
	their MPP, local hydro utility, etc. There is no excuse to not inform the
John Cooper	public directly. What is the Ontario government hiding and why?
	In this era of renewable energy it is ridiculous to be building gas plants at
John Deviney	the same time as encouraging electric vehicle manufacturing.
·	We just can't keep doing things like this. Climate change is already upon
John Mark Robertson	us.
	Here's a thought; How about trying renewable sources of energy ??!!
John Radoman	duuuuhh !! Wake up and smell the f'n roses !!
John Sloan	Our children deserve a planet that supports health, not detracts from it.
	Geothermal Sources should be investigated see Alberta No. 1
	https://www.albertano1.ca They last forever, run 24 hours a day and cost
Jorma Ikavalko	\$.02 per Watt to run.
	The science is clear- we must take dramatic steps to move away from
Lacalum Dadaliffa	fossil fuels or face devastating consequences to our health. We
Josalyn Radcliffe	absolutely cannot afford this gas plant if we want a liveable future.
Judith A Murray Judith Blonski	Let's not go backwards for the sake of our children and grandchildren!
JUUILII BIOIISKI	I am very concerned about the environment. As asked in the above letter, please conduct a full assessment, with a
Judith Trites	review panel, on this project. Thank you!
Judicii Trices	The Air We Need The Air we Breath We have a choice and we can do
Judy Debeer	what it takes Please for my kids future.
	PS Please think about the future of your children and grandchildren vs
Judy Edgar	the money.
, ,	NO! What can Ontario be thinking! ? Such decisions cause me - and
Judy Lewis	others? - to look for an ulterior motive!
	The Conservatives toppled the McGinty government over a gas plant.
Judy Monahan	Now they want to build a gas plant! WTH??
	We don't have long to change our ways before the damage to the
	environment makes the climate crisis irreversible! Please invest
Julia Michener	taxpayers money in ways that will actually benefit them.
Julie Alexander	Please save us all.

June Wilson	You know this isn't right, why are you doing it?
	Recent research has shown that in order to hit the emissions targets in the Paris Agreement (both the 2C goal and the 1.5C stretch goal) no new fossil fuel plants can be opened, and in fact many fossil fuel plants will need to be retired before their expected lifetime is over. The fact that we are considering opening NEW fossil fuel infrastructure is clearly a step in the wrong direction that flies in the face of what scientists around the world are begging for in order to mitigate the climate crisis. Please help push us in the right direction, for the sake of all living things - human, non-human, born and unborn. Thank you. Carton W. 2020. Carbon unicorns and fossil futures: Whose emission reduction pathways is the IPCC performing? In Has It Come to This? The Promises and Perils of
Justin Steinburg	Geoengineering on the Brink, ed. J Sapinski, HJ Buck, A Malm, pp. 34–59. New Brunswick, NJ: Rutgers Univ. Press
K. Patricia Smith	Stop adding GHG emissions to our world! Use the money to build forward-thinking energy plants based on renewable energy!
Karen Heisz	Please direct the money budgeted for this plant to small scale renewable energy projects because they provide more sustainable, local and efficient generation of electricity.
Karen Manteiga	I say no as well to any new gas plants being built as well as the 413. They have to stop and fix what we already have.
Karen Nash	Definitely a step backwards. Unfortunately governments plan on short term because they think in 4 year increments. We can talk 10-50 years down the road but politicians will either be dead and not have to live with their decisions or taken safe haven outside of Canada.
Karen Weatherill	The current government is not taking climate change seriously and we have another 4 years with this government moving in the wrong direction.
Kate Brookfield	Read up on the Permian extinction! 50 years to the next oneunless we take drastic action.
Kate Kourtsidis	This government greenwashing MUST END. We will continue to expose the frauds you are.
Kate Mckay	I really wish I could stop signing petitions/letters and instead trust that elected officials actually had everyone's best interest at heart. Scientists have made it painfully clear that we are at a tipping point. Please make smarter decisions. Please put the planet first; if we take care of it, it takes care of us. It really is that simple.
Kathleen Goretsas	Bad decision on your part for not just humans in general but for our earth!
Kathleen Kilburn	You have to stop this! It's insanity, it's killing us, and it's killing the planet. Take this money and move into support for non-fossil fuel development and delivery, and incentives for consumers to switch. What do you want your heritage to be? A greener, cleaner, safer, healthier province? Or another toxic dump?
Kathleen Moleski	Greenlighting this project would simply be the wrong thing to do in light of Ontario and Canada's responsibility to cut greenhouse gas emissions and pollution levels. Since closing down the coal fired plants Ontario has
	1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 -

	enjoyed cleaner air and has produced fewer greenhouse gas emissions. It
	does not make sense to go backwards in terms of pollution and GHGs,
	nor to compromise the goals of the CES and Canada's emissions
	· · · · · · · · · · · · · · · · · · ·
	reduction pledge. Most Ontarions want to see stronger climate action.
	Please keep this in mind when conducting your assessment.
	Unbelievable!! When are you folks going to get it. You just don't care
L	about the world around you, only the almighty dollar. How selfish you
Kathryn Ogiltree	are.
Kathryn Petro	Move FORWARD not BACKWARD.
	Last time I looked, gas was still a fossil fuel. We need to invest in
	renewable fuels - solar & wind - not fossil. When will someone explain to
	the Ontario government that climate change is real & must be acted
	upon immediately. The time for talk has long passed - action is needed
	NOW. Please think of a future where severe floods, fires, extreme storms
	are not the accepted. We must prevent these extremes, not react to the
Kathy Coleman	consequences. Thank you.
Kathy Crozier	Our planet must be respected
	No surprise here. Doug Ford, get your head out of your ass and stop
	being a big part of the climate change problem!!! You're going in the
Kathy G	wrong direction, AGAIN!!!!!
	As well, it contradicts your push to build 400,000 electric vehicles by
Kathy Macmillan-Jones	2030. At the very least, don't undermine your own plans!
Kathy Mortimer	We can't keep burning fossil fuels!
Kathy Thorpe	Gas plants should not be part of our future!
	Poor Sarnia Get serious about supporting renewable energy now
Kelly Clune	instead!
	I grew up in Sarnia. Workers in Sarnia need jobs that will help them
	transition from dependency on fossil fuel-based employment. This
Kenneth Epps	project is the opposite of what is needed.
	A new gas plant should not be built! It will not only create carbon
Kerry Lee	emissions but also dangerous nitrogen oxides!
,	Hydrogen ready? Why not hydrogen now! We are already 20 years
	behind on climate action and this government is ignoring the crisis. I still
Kim Cousins	don't have anywhere to charge my electric KIA in downtown Toronto.
Kim Somers	We need responsible leadership on renewable energy sources!
Laurel Hood	There should be no new fossil fuel infrastructure built in Ontario.
	I'd be ok for some gas development IF the govt had a credible track
Lauri Asikainen	record on weaning off from fossile fuels.
Laurie Galer	Please respect our environment. Invest in renewable energy instead.
	What the hell else would you expect from the Ford Governmenttotally
Laurie Hanmer	unconscionable, in everything they do. I all about the money
Educite Hamilier	Stop this insanity! We need environmental protection. NOT a gas
Laurie Sinclair	plant!!!!!
Lauric Sirician	I would really love to understand why the Ontario government still does
	not get the message!! These are decisions that are opposite to what
	actions NEED to happen to ensure a change. I'm tired of hypocrites and a
Loccino Maitland	
Lescine Maitland	world that does not take healing our planet seriously.

	This Ontario government is doing whatever it can to increase damage to the climate. This is just one more example, following so many others including giving Enbridge tax payer money to lay pipelines at a cost of
	over \$36,000 per home that's hooked up. Why is the government doing
	this, when air source heat pumps that also provide air conditioning, cost
	half this amount and do not produce GHGs. 75% of Canadians are
Lesley Hastie	concerned about climate change.
Lia Mckinnie	Student and young person afraid for the future of this planet.
	Student and young person scared for the future of Canada and this
Lia Mckinnie	planet.
Linda Sheppard	NO!
	Ontario government - what are you thinking!?? Another gas plant would
	add more pollution and fossil fuels. Are you not listening to science and
Linda Squires	not concerned for our future?
Lisa Adrienne Murdoch	Lisa A Murdoch
Lise Faubert	We need zero emissions NOW!!
	Every single day, I feel concerned about climate change and the fact that
	we are doing far too little. As an employee of the provincial government,
	I have been incredulous and absolutely disgusted that some of my
	colleagues have been barred from acknowledging climate change in
	government reports! Stop disseminating denial, and get to work on
	solutions that address this very real and urgent crisis. Ontario MUST do
Lise Sorensen	it's part to lower co2 emissions and curb global warming!
	This is a giant step backwards if it happens. How will you explain this to
Liz Armstrong	your grandchildren, or do you care enough about their future to bother?
	We should be transitioning to a green energy GHG reducing future
	preparing to be net zero by 2050. We can't afford to invest in an
Liz Benneian	unsustainable energy system and a more chaotic climate.
	This plan seems to be regressive and counterintuitive in the light of our
	fight to save our planet and reduce carbon dioxide emissions. It's hard to
Liz Dobrzanski	believe that it is being considered seriously.
	Maybe canceling wind contracts and tearing out charging stations wasn't
Lancia Ballan	such a good idea from our Premier. Something past a barely obtained
Lonney Butler	Grade 12 might be a good requirement for Canadian politics.
	We have very little time left to arrest climate change and global
	overheating. This will disrupt our food supplies, amongst so many other
Lori Borthwick	issues. We need clean electricity! Not more dangerous methane and nitrous emissions.
LOTT DOT UTWICK	Why for God's sake do we want to build more plants that pollute!!! Stop
Lorraine Valenzano	this before we have no province left much less planet!!!!
Louisette Lanteigne	Move beyond fossil fuels ASAP.
Louisette Luiiteigne	Please, please reconsider and get us on the right track for GHG emission
Lucrezia Chiappetta	reductions.
	As a senior engaged in action on the climate emergency I am deeply
	disappointed but not surprised that the Ontario government under Doug
	Ford continues to dismiss the danger we are in. With little movement
Lyba Spring	from the federal government to phase out fossil fuels, he feels he can
	, , , , , , , , , , , , , , , , , , , ,

	with impunity expand rather than contract gas plant developments. Not
	on my watch.
Lyle Hargrove	No more gas plants. Let move to electric
	The IPCC has called on all governments to stop adding any new fossil fuel production or use and that includes Ontario. If we care about our kids, and I certainly do - and my grandkids too - then this will absolutely be shoved off the table. We need a massive investment in renewables and conservation to meet the needs of our grid. Ontario has shockingly cancelled hundreds of renewable projects in the last 4 years - now is the time for a change in direction and bring renewables back to the centre of
Lyn Adamson	our energy future.
Lyn Folkes	Please, for my family's sake and for all of us, stop building and new major fossil fuel infrastructure! Have you noticed the lack of rain this summer? That's our climate changing - I studied this at the University of Waterloo in the 1990's. We already knew that climate changes would become a disaster for humanity then now it is starting to happen much worse than predicted and yet you continue to act like there is no climate emergency! Please stop, think and help! You are accelerating the very event that will harm us all more than any war or disease can. Remember the panic during the Covid-19 pandemic? Climate disasters such as food shortages and a lack of clean non-toxic drinking water are going to be much worse!! You are killing us slowly by pretending that nothing is wrong, by denying the climate emergency. It's real and happening already but it's scale is an exponential one so this will get worse faster every year, and the pace of climate warming has surpassed every valid scientific prediction to date. You are literally 'playing with fire' by building new fossil fuel plants for Ontario's energy use. Please get smarter quickly!
	Why does Ford keep adding to the problem?? Ontario made a big mistake in voting him in a second time. He certainly make his motto clear-I am going to make as much money as I can and the heck with
Lynda Pilon	climate change!
Lynn Allan	Very, very concerned that the government of Ontario does not seem to understand the urgent need to address climate change and use truly renewable resources to provide electrical power
Lynn Mcclory	No to poisoning the atmosphere with another gas plant.
Lynne Garvie	PLEASE switch to planning that is positive for future generations.
,	Under the Wynne government, air quality alerts all but disappeared. Under the Ford government, the environment loses. And, the people of
M & R Dimuantes	Ontario lose. We certainly don't need another plant like this near Sarnia. People plants and animals there are already suffering from the pollutants from the oil
M. Ford	refinery!
M. S. Winberg	No more gas plants, please!
Maggie Nebout	Please do not allow a gas plant to be built as we already have too much pollution in Canada. We need to preserve the environment

	Please note that while I am using a template provided by an NGO to
	register my concerns, I fully subscribe to its content. I am very concerned
	about the wrongheaded direction that out Province is taking. We should
Marcello Mancuso	be moving away from fossil fuels for environmental reasons, but also to foster self sufficiency and economic stability.
Marg Buckholtz	Ontario must take a stand against climate change.
Marg Foy	Absolutely NO to a new Gas Plant in Ontario.
Margaret Harris	We should move forward to environmental
	Hard to imagine the Ford Government is heading backward, makes
Margaret Howard	Ontario more like the USA every day
	I think of the world my grandchildren will inherit and want to address
	climate change immediately and aggressively for their sakes. This
	proposed project goes in the opposite direction and should not be
Margaret Stewart	approved.
1	I want to add my voice to the concern of other Ontarians regarding the proposed new "hydrogen ready" gas plant. It is utterly devastating to
	know that money always speaks louder than the health of ourselves and
	our fragile planet. When will Ontario ever, ever, ever learn that there is
Margarete Wiebe	so little time left to even try to right our environmental crisis!
	As of 2020, grey hydrogen is produced by the use of fossil fuels resulting
	in carbon dioxide emissions. Emission-capturing blue hydrogen emits
	20% more greenhouse gas than burning coal or gas. We are nowhere
	near green hydrogen. There are many questions about this proposed
	plant, including what type of hydrogen is being produced, level of carbon
	dioxide emissions and what technology is being used. It is disingenuous to promote this as a green, non-polluting, progressively technological
	solution to producing electricity or even as a large step towards that end.
	There is very little information about the fact that it is produced with
Margot Dawson	fossil fuels and the public should be fully aware of this.
	We cannot afford four more years of self serving, ignorant,
	environmentally dangerous CONServative policies! Get your heads out of
Maria Bozzo	fossil fuels before we all become fossils!!!
	As waters rise, forests burn and people and animals succumb to drought,
Maria Kasstan	dinosaur politicians endanger our grandchildrens' future by acting like the climate isn't changing.
Maria Kasstan	Not only is the Ontario government pushing away our environment but
	now also it wants to push the St Clair region to push for more destructive
	gas plants. Shame on this government for failing to protect future
Marian Gerson	generations.
Mari-Anne Tate	It is 2022. Get off GAS.
	No fossil fuel new projects. We must phase out our dependence for
Marilyn Baker	climate change, now!
	This is not protecting Ontario's environment. Even Conservatives need to
	be more forward thinking and plan for the future not just the next
Marilyn Green	election.
Marilyn Irich	We need to move towards lowering our gas emissions and phase out
Marilyn Irish	dirty fossil fuel .

Marilyn St.laurent	No no no. Please stop this
Marilyn Stinson	Bring back the green energy initiatives cancelled by Ford.
TVIGITIYIT SCHISOTI	Why do we have to keep fighting these stupid proposals when anyone
	with half a brain knows that it is not good for anyone but the supplier.
Marion Pennelli	And not even them in the long run.
IVIATION FEITHER	Please make a choice for the future! We all want our children and their
Mark Melonaghan	
Mark Mclenaghan	children to have a future, we need to act now.
	For goodness sake, you've just been re-elected. Show at least some
NAcula Chimbina	leadership and concern for the people of Ontario and our children's
Mark Stirling	future.
Martin And Sylvia Gordon	Absolutely NO!!
	More renewable energy is not only more sustainable, it is definitely
Martin Betz	cheaper.
	Rather than increasing the dependence on electricity, Ontario (indeed all
	of Canada) should be aggressively installing thermal networks for heating
	an cooling to minimize the need for electricity and absorb fluctuations in
Martin Green	electricity demand and supply.
	This is a backwards action. It is very disappointing that you are not saying
Mary And Bill Shepherd	"no" to the old way of doing things. Please don't do this.
Mary Ann Hogan	Time to switch from gas to renewable energy!
	Why are allow these hidden agenda items coming out AFTER the
	election!? Did we not learn from the COVID lockouts when we saw the
	earth starting to heal itself as there was less and less emissions! No more
Mary Barrow	gas plants!
	Why are we going so backwards on this matter? The conservatives have
	campaigned on how badly the liberals bungled a gas power plant-and
	now you are going ahead and doing the same! this belies reason in light
Mary Boudart	of the climate emergency we are in today.
	Mr. Fordyou cannot brag about making electric cars on one hand, and
	with the other, continue expanding fossil fuel industries. Commitment to
	green energy doesn't work like that. Everything on earth is in a climate
	crisis and that includes Ontario. Existing gas plants should be
	decommissioned as green energy systems come quickly on line. Forget
	putting public money into new gas plantsit doesn't make economic
Mary Bromley	sense for a crisis you are going to have to dig us out of in the end.
Mary Elek	An energy impact study is vital before it's too late.
	This letter says it all. We should not even consider hydrogen as a fuel, for
Mary Sealey	the reasons in Point 5.
	We need to do better when we know this is not the answer and be more
	responsible for future generations. Costs of renewables will never
	become economically favourable as long as we continue to support and
Matthew Chu	subsidize the fossil fuel industry.
	We have such a short window to act for our kids and future generations -
	a power plant makes so much more of a difference than individuals on
Matthew King	our own path and desire to lower emissions.
Maureen Coleman	Please put the investment into green energy. Stop this new plant!

	The standard of the standard o
	This is absolutely the wrong way to go. More problems for our children to
	solve, more money spent on mitigating the floods, fires and droughts
Maxine Cupido	from climate change - what on earth are you thinking????
	A new gas plant is clearly the wrong way forward to a clean energy future
	that we need to ensure our children have a future, and there are so many
Meg Olson	more ways to create jobs that don't rely on environmental destruction.
	I am against the implementation of a new gas plant in Ontario. We
	should be working towards, and investing in, renewable sources of
	energy in order to meet our greenhouse gas emission targets. Opening a
	new gas plant is a step backwards, and should not be permitted at this
Megan Gilchrist	time. Thank you for your consideration of this very important matter.
Melanie Dorscht	No!
Welattle Dorscit	
	Come on, Mr Ford! Thinking outside of the box is what we need. We do
	need energy, but please consider new ways of creating energy that will
	be less harmful to the environment of our province. Gas is no more an
	option. Help the economy by stimulating companies with creative energy
Melanie Soustelle	solutions that are environmentally friendly. You can do this!
	This is absolutely unacceptable given that we're currently in a climate
Melissa Dalgleish	emergency.
Michael Ballin	Essential indeed to reduce gas in this climate crisis
	"If you do not have a loving concern for the environment in which you
	dwell, it will no longer sustain you. You will not be worthy of it. You will
	not be destroying the planet. You will not be destroying the birds, bees,
	or the flowers, or the grain, or the animals. You will not be worthy of
	them, and they [their disappearance] will be destroying you." 'Seth
Michael Kursbatt	Speaks: The Eternal Validity of the Soul' by Jane Roberts (1972).
Michael Robertson	PLEASE!!
TVIICITUCI NODELESOTI	Please ensure proper scrutiny and environmental assessments of this
	proposal. Surely we don't want to move backwards when it comes to
Michael Strahl	protecting our environment. Rather, we need strong leadership to ensure
Michael Strani	proper environmental protection into the future. Thank you.
	Will this government never listen and learn? The electorate has said no
	to gas plants and environmental specialists oppose them. So what
Michael Summers	possesses government to go against science and public opinion?
Michelle Kahn	No no no!
	Ontario seems intent on destroying the natural beauty and ecosystems of
Michelle Mawhinney	the province as quickly as possible. Time to put the breaks on!
	It's not only outrageous but immoral in the face of what the planet is
	being subjected to, that we even contemplate burning more fossil fuels,
	especially when we can buy green Hydro Electric power from Quebec at a
Miguel Hortiguela	fraction of the price.
<u> </u>	Please impose a 10 year sunset on this plant. This plant or a carbon
Milton Charlton	equivalent plant must close within 10 years.
The state of the s	Time for the provincial government to get Educated about the
	environment. You are all about the money. What good is money when
Miriam Krieger	you can't breathe.
iviii aiii kiiegei	you can t breatne.

	DI CTART DRACTICINIC DENEMARIE ENERGY ORTIONIC D. II.
	Please START PRACTICING RENEWABLE ENERGY OPTIONS. Don't replace
	coal with NATURAL GAS. Aren't you aware of the GHGs and affecting
	climate crisis. I am appalled you are considering this. Look at other
Mj Hanley	countries on the way to clean ENERGY.
	This is insane, are they ever going to open their eyes to all the
	destruction of our planet! It keeps getting worse and the idiot politicians
Monica Dennis	just don't give a dame. Their pockets are being lined from big business.
Moninna Running	No more gas plantshealthcare is in chaos!
	Dear Premier Ford, I lived in Oakville when we voted down a proposed
	gas power plant. It was canceled by the previous government. This was
	the right thing to do. Gas power plants create serious air pollution
	problems. It also does not make sense to burn gas that is imported via
	pipeline from the West Coast and subject to leakage and other problems
	along the way. I don't see why methane (gas) from municipal sewage
	treatment plants can't be used instead. This would solve two problems at
	once. It has already been implemented in Rochester, New York. So it's
	not simply a matter of a gas plant; it's the kind of gas that is used. Please
	redesign this plant so that it runs on sewer gas or outgaussing from
	landfills. It's the sensible thing to do. Thank you for your time. Very truly
Nancy Beiman	yours, Nancy Beiman Toronto
,	Adding gas plants to the electricity grid will make it even more difficult
	for Ontario to do its fair share to bring down Canada's emissions in line
Nancy Fraser	with the Paris Agreement.
Nancy Gardiner	Stop putting money before a livable planet!!!!!!!!!!!!
	Using the term Hydrogen Ready to deflect away from the true nature of
	this gas plant is misleading advertising. Explain the steps to get from a
	functioning gas plant to a fully functioning hydrogen fuel plant plus the
	time and costs involved. Then tell us when this will happen. In concrete
Nancy Kelman	terms please. No some hazy prediction.
	Can you really not see what is happening in the world, and the
	catastrophic events happening, because of climate change. No more. We
	need to go green, and turn the clock backwards, getting rid of gas, and oil
	detrimental damage. If you care for the people, which you darn well
Nancy Lowe	should, then start making sensible decisions to help us thrive.
	Now that Maine has rejected Hydro Quebec plans to send hydro power
	through Main from Quebec, Ontario has another chance to import hydro
	from Quebec. That is clearly what Ontario should do. Creating more gas
Naomi Miller	plants is criminally stupid and unnecessary and should be stopped
	We should be getting away from projects that affect our environment
	and cause more problems for the planet. Instead, it would be great if we
	can focus on renewables, Solar and Windmills etc., Encourage people to
Narayana Reddy	have Solar panels on their houses and support them.
. tarayana neady	Natural gas is cheaper because carbon pricing has not fully kicked in. As it
	goes higher and higher and as climate impacts hit us harder and harder
	we will see the true cost of this new fossil fuel infrastructure. Even my
	brother who is a climate denier uses a solar water heating system for his
Natalia Talfor	
Natalie Telfer	pool because it makes more sense to use the sun's power than paying for

	fossil fuels. Are The next generations going to blame us if we saddle them
	with the costs of this infrastructure along with the costs of global heating
	which include damages to their property and skyrocketing insurance
	costs? A FULL assessment is the LEAST you can do when proposing something
Natalie Ungara	that scientists are against.
	Electric vehicles aren't powered by renewables but by natural gas. This is
	a smoke and mirror show look behind the curtain and see the fossil fuel
	industry gaslighting consumers into buying EVs but this means more
	carbon emissions and natural gas plants in Ontario. Ontario was the first
	to stop using Coal. We can get our electric needs by using hydropower from Quebec. It is a win-win for the environment and taxpayers' money.
	Natural gas contaminates water supplies and soil. We have the greatest
	resource in the world of Freshwater supplies why would we pollute our
Natasha Vaney	water, soil, air we breathe?
Nickolas Florio	WTF
Noel Marie Ruelland	No gas lines anymore please
	It's about time we get on track and stop the delay Ontario! We need to phase out Dirty Fossil Gas! we need to do this Now, Not next week not
P G Harrod	next month , NOW. PGH
	Enough is enough!! You're selling us out & soon there will be nothing left
Pamela Ross	for anyone
	Let's focus on making the planet healthy or we'll all be in far worse
	shape! COVID will look like a drop in the bucket in comparison. And health care will be abysmal if we continue down this path. Forget good
	quality air, soil and water and subsequently our food source thus
Pat Lumsden	compounding our health care problem. Haven't we seen the light yet?!
	The trees are already dying in Windsor. So are the people!!!!! Stop this
Pat Maynes	insanity!!!!!
	NO NEW GAS PLANT. Why can't the people we elect to look after us
	understand that our planet and civilization are on the brink of unprecedented disaster if we don't change our thinking and start to work
	to save the planet, not continue to destroy it? Do you care so little for
	your children and grandchildren? Or not at all? I'm sick of tip-toeing
	around the issue. We are destroying our world, and if our elected
	politicians don't understand this, we are all in grave trouble.
Pat Valentine	Greenwashing your actions is just lying. NO NEW GAS PLANT even if
Pat Washington	"hydrogen-ready," whatever that means. No, no no! We need to invest in CLEAN energy not DIRTY!
T de Washington	It worries me that Ontaro would even consider building a new gas plant
	when the climate crisis the planet is facings so urgently needs to be
Patricia Grant	addressed.
	These present plans are totally irresponsible and need to be stopped
Patricia Grundy	immediately It is about time that the Ford government learn about climate shange
	It is about time that the Ford government learn about climate change and the environment. We need to protect the environment, not destroy
Patricia Konkle	it. The costs are too high to correct the damage done by environmental

	desasters caused by short-sighted government decisiona. Please move
	toward protecting the environment. Clean air, clean water, clean soil.
	The proposal for a new gas plant in the Township of St. Clair would be a
	disaster for the future of Ontario, Canada and the world. It is well known
	that Ontario's gas plants are amongst the biggest polluters. We do not
	need another major polluter in Ontario. We need to get serious about
	meeting climate change targets. Thank you for this opportunity to
Patricia Lefebour	provide comments.
Patricia Mills	Please don't build another Gas plant.
	Need a full environmental assessment to ensure this plant does not add
Patricia Rogerson	to our pollution problems.
	I am extremely concerned about the use of natural gas in the province.
	Starting with the Natural Gas Expansion program where my community
	in Selwyn township is part of Phase 2. And now learn that plants are
Patty Macdonald	being built along with these subsidized pipelines.
	It boggles the mind that any government would plan new massive fossil
	fuel infrastructure at this juncture. Say no to a plan that would lock in
Paul Berger	further climate destruction.
Pauline Cousineau	We need to get a hold on this matter
	No Gas plants! We need to be a leader in GREEN Energy! Wind, water,
	Solar- my God what is wrong with you people? Stop bowing to investors
	who have money tied up in fossil fuel. Your children and grandchildren
	will suffer the consequences of your decisions as will mine. Money will
	never be able to provide clean air, water and a livable environment if we
- 11 I	don't get our priorities straight now! Do the hard thing now- which is the
Pauline Wheeler	Right thing to do- Go Green!
5 161	We would be well served to move forward, not backwards. This plan is
Pearl Shore	ridiculous.
	It's difficult to evaluate the contruction of new gas plant without any
Peeter Vanker	information regarding the necessity, nor the overall long term plans by
Peeter vanker	the government.
Donny Dichardson	To the politicians who control our actions and destiny Just a hint
Penny Richardson	pleasewhen are you going to learn?
Peter Dafos	Don't you dare make any fossil fuel crap. Only incompetent losers would make one
Peter Gagnon	Time to wake up and get off the gas!
reter dagnon	PLEASE GOD NO!!! PLEASE COMMITTIE, decide AGAINST this disastrous
	proposal, one that destroys communities and the environment, that
Peter Gugeler	takes the coward's road instead of the forward-thinking one.
i cici Gugelei	Gas plant controversy killed the Liberals. Why do the Conservatives want
	to go stupid rather than green? Or, perhaps the only green you
Peter Kaellgren	understand is found on dollar bills.
i etel Rueligieli	This project is not either your only nor your best option to deal with our
Peter Moller	energy needs. PLEASE, for god's sake, do not do this!
Peter Taylor	Stop it!
1 Ctcl Tuylol	Impact study. Unfortunately we already know the study will be skewed in
Randall Ross	favour of the petroleum industry. This whole situation feels like riding a
National NOSS	Tavour of the petroleum muustry. This whole situation feels like nullig a

	run away train with disaster waiting not far down the track. There are
	run away train, with disaster waiting not far down the track. There are hundreds of Studies proving this is not they to go. The government must
	show leadership in stopping this disaster in the making. Randall Ross
	Why does this government continue to do everything it possibly can to
	, , , ,
	decimate our environment and natural green spaces? Do they not care
Dahasas Mahay	about their own future generations? Or is their only concern their own
Rebecca Weber	wallets right now?
Rhonda Moscoe	Please more nature for our children.
Richard Hart	Do the right things for the sake of us and our children!!
	With all of the resources at your fingertips, you choose to use old
Rick Anderson	technology. Now is the time to innovate. You can and must do better.
	We do NOT need new highways, we do NOT need new fossil fuel
	pollutants like gas plants. Stop supporting your corporate pals and try
Rikie Schieven	actually serving the people!
Rob Larsen	It's time to get off fossil fuels!!
	We need to move to the next step and stop rationalizing intermediate
	goals. Gas is better than coal but it is not a short term solution. Go
Robert Brown	directly to hydrogen if that is the plan.
	Thank you for taking action on this serious issue. Sincerely, Rocco
	Frangione Rocco Frangione < Personal information removed>
Rocco Frangione	<email address="" removed=""></email>
	Hopefully someone actually reads my comments here. THE ABOVE TEXT
	IS A FORM EMAIL, BUT I AM 100% OPPOSED TO THIS PROJECT. Adding
	more fossil fuels and more pollution is not the answer. The asinine PC
	government cancelled all the green energy that was in the works, putting
Roger Best	us in a mess; they need to bring it green energy back.
-0	The globe, Canada, Ontario must transition away from fossil fuels, and
	invest in no, low carbon emission options Hydro, wind, solar,
	geothermal, nuclear. Fossil fuels are driving climate change, with
	enormous economic, environmental, social consequences. Ontario can
	achieve net-zero targets, or ignore the science at our peril. This
	government has committed to becoming a leader in electric vehicles.
	Let's become a leader in low emissions. Do not invest taxpayer monies in
Roger Goulet	fossil fuel.
Ron Mckee	"Hydrogen-ready" is just green-washing.
NOTI WICKEE	I want to go on record as being against a new gas fired electricity plant.
Rosalie Cheriton	
Rosalle Chefiton	Ontario must support clean sources of power.
	Liberals got crucified for Gas Plants by the very person who is now
	endangering our food security, our children's health and economic future
	by riding rough shod over all Environmental and Ecosystems Concerns.
	Rise up people and STOP this madness. We are in the 6th Extinction
Roscoe Petkovic	Event thanks to the ideology that Ford follows!
	It's high time we switched to clean, renewable energy sources! (Not
Rosemarie Morris	"natural" gas and not nuclear power).
Rosemary Meier	hope that the urgency also reaches the Government
	Enough Doug Ford Your attention should be 100% focused on Climate
Rosemary Miller	Change & phasing out Fossil Fuels! We ONTARIANS demand you invest

	their Taxes into Clean Energy & Not to Placate your Rich Buddies with
	their Dirty Fossils!
Russ Coles	This really should not be up for consideration. The only future is non-carbon. Let's get focused on that.
Ruth Pezzack	You just lost my vote
Ruth Plant	There are better ways to produce electricity which are less polluting and sustainable. The use of fossil fuels needs to stop now to help us provide a future for the next generation.
	Why would we add a gas facility of any kind at this point? We really
Ruth Schembri	should be heading in the opposite direction!
Ryan Mcleod	We need to take greater steps to improve the environment for us and our children
Ryan Van Eerdewijk	This is moving in the wrong direction. Would rather see a smaller nuclear plant than this.
S. Moore	We are already behind the times in terms of energy crippling future generations.NO new gas plantWe must invest in green energy going forward .
Samantha Bland	What more is there to say. Don't do it. Just STOP!!! Our Climate Crisis isn't going to negotiate or compromise with us.
Sandra Campbell	I demand a full impact assessment
Sandra Finley	NO WISE CULTURE WOULD EVER HARM THE ENVIRONMENT.
Sandra Marshall	Premier Ford: It is time to look at the big picture. The children of today will not be lauding you as a wise leader.
	We don't need a new gas plant what happened to the fossil fuel cutback this is only moving us backwards instead of forward where we need to be. Start thinking about tomorrows future with our children. They don't
Sandra Plewes	need this
Sandra Wilson	Priority #1 climate change!!!!!
Sandra Wood	No more gas plants! That is absolutely moving in the wrong direction!
Sandy Stagg	Another Gas Plant is the wrong wau to go. ITS A BAD IDEA
Sandy Wilcox	The gas belongs to us! We the ppl of the kingdom of Canada! You don't have rights here!
Sara Whitteker	No new fossil fuel infrastructure!
Coatt Dogg	As a civil / environmental engineer, urban planner, and concerned ontarian, at a time when the science is clear that we must act now to prevent the worst impacts of climate catastrophe, I strongly oppose the
Scott Bagg	further investment in additional fossil fuel infrastructure. So, are we just going to pretend climate change isn't happening, or are
Scott Kuipers	we going to try to do something about it?
Serge Et Sylvie Bergeron	No more fossil fuel plants. Stop this nonsense.
Sharon Hinbest	If Rob Ford and Doug Ford keep being admired in history and in the now for making business better we will never have a future. Stop polluting, your approach is like trying to ride a bicycle backwards.
Sharon Sommerville	Follow the money. Which of Ford's buddies is going to benefit from building this dinosaur?
Sheena Currie	We must commit to greener alternatives for our children and the future if this planet Mother Earth.
	<u> </u>

Sherri Hartlin No more government overreacting enough is enough. I beg you to consider and understand all the information in this letter so you will act accordingly. Thanks. We need to plan for the future with new green technologies not remain in the past. Shrutl Mittal NO NEW GAS PLANTS IN ONTARIO! This makes no sense with the whole mess going on in the world right now. We need to lower reliance on fossil fuels as soon as possible and really push for new renewables. This power plant should not be built as it will worsen the already dire climate emergency. If a power plant is truly necessary, one that does not burn fossil fuels should be built instead. Wind power with battery back up will easily meet the demand. Looks like good old fashion patrionage/bribe money is in this file. Stefan Kowalczyk Stefan Kowalczyk Wind power with battery back up will easily meet the demand. Tanya Zborii We The People don't want it!!!!		
	Tanya Zboril	We The People don't want it!!!!

	If hydrogen is to be used as an energy source, then we need far more
	green energy to produce the hydrogen. Otherwise the carbon emissions
	to produce the hydrogen will be very large. So we need to be focussing
	on green energy to produce hydrogen. Without the green energy this is
	just another gas plant which adds to the carbon emissions in Ontario. We
Ted Mcpherson	need to phase out gas plants and not build more.
Ted Michierson	Reduced energy needs through energy loss prevention is what's needed.
Teela Johnson	Not more coal.
Teresa Chan	No more gas plants needed anywhere.
Teresa enan	Ontario is not on track to meet its own weak greenhouse gas emissions
	targets. Adding gas plants to the electricity grid will make it even more
	difficult for Ontario to do its fair share to bring down Canada's emissions
	in line with the Paris Agreement. If Canada is going to have a hope of
	reaching zero emissions by 2050, its second-largest emitting province
Terrie Miller	needs to phase out dirty fossil gas - not burn more.
Terrill Maguire	This proposal is completely out of touch with the realities of our time.
Terry Millan	C
,	The Ford government says that it takes change change seriously but it
	actions speak louder than its bogus Made In Ontario Environment Plan
	words. Expanding fossil infrastructure at a time when climate scientists
	are calling for an accelerated phase out is ecocidal behaviour. This has to
Terry Moore	stop. Now.
	PLEASE GET THIS GAS PLANT BUILT AS QUICKLY AS POSSIBLE. CANADA
	NEEDS TO GET THERE HEAD OUT OF THE SAND. TRUEDOPE AND HIS
	CRONIES MUST GET CANADA CA REVENUE BEFORE WE TURN INTO A
Terry Wayne Merlin	THIRD WORLD COUNTRY.
Tina Fanzo	We are moving backwards with this proposal!!
Tony Hill	A new gas pant? It should be a renewable green hydrogen fuel cell plant.
	We are in a climate crisis. The last thing we need is to go back to building
	old world technology that uses fossil fuels as energy. What are you
Trish Mcmaster	thinking???
	Please take care of our environment it is the only one we have! Support
Valerie Houston	clean energy businesses more and they will provide jobs.
	Please help us move into a clean future, *not roll back* into an
Valérie Kaelin	unsustainable path toward a climate apocalypse.
	It was unconscionable of Doug Ford to cancel the almost complete wind
	farm in Prince Edward County which cost the people of Ontario \$231
	million. Now he wants to build a dirty gas plant near Sarnia. What do the
	First Nations people living near Sarnia think of this plan? Have they been
	consulted? Sarnia is the last place in Ontario that needs more emissions
Vicki Sherwood	and pollution. It is already so bad that it is known as the armpit of Canada. Under no circumstances should this gas plant be build.
Virginia Edman	This is the wrong thing to do!!! We must do away with dirty fossil fuels!!!
Walter Vieira	Do the right thing Premier
Wayne Wauro	No gas Creates bad air days.
vvayiic vvauio	How is this part of the "Green Plan"? Can anybody is their political offices
Will Gordon	even hear what the public is saying?
will dolabil	Leven hear what the public is saying:

	When the hell is government going to realize that we have a problem
William Clarke	that needs addressing NOW!!!!
William John Currie	Stop this plant.
	The Ford government seems bent on returning to the 1950s, wasting
William Ratcliffe	money on gas-guzzling. Ford is in reverse.
Zia Khattak	No to Air pollution in GTA
