RE: Draft Impact Assessment Report

Thank you for providing Northeastern Public Health with the opportunity to provide feedback on the Draft Impact Assessment Report.

We have carefully reviewed the relevant sections and do not have any significant concerns with the content or suggestions.

Please note that we support the information provided by First Nation communities and Indigenous partners as they have been the stewards of the land, waters and living things for time immemorial and are the most knowledgeable about the impacts of this project.

Sincerely,

Chantal Riopel, RN, BScN, MPH
Director of Strategic Support/Chief Nursing Officer.
