## 2. Expertise

Please identify and describe the area of expertise within your ministry that is relevant to an assessment of the Project.

Provide strategic tourism policy and planning expertise to industry, other ministries and other levels of government. Promote activities that protect, diversify and enhance tourism industry interests on lands and waters in Northern Ontario.

Act as leads for reviews of projects that undergo federal impact assessments and provincial environmental assessments.

### 3. Key issues and solutions

Respond to the following **using Table 1 on the last page**

(a) From the perspective of the mandate and area(s) of expertise of your ministry, what are the key issues that are material and relevant to decision-making and should be addressed? In identifying key issues, be mindful of the Project's context (size, scope, geography, policy) and the definitions of *effects*,<sup>2</sup> *sustainability*<sup>3</sup> and *public interest*.<sup>4</sup>

(b) For each **key** issue:

- i. Identify the relevant valued component(s) within your mandate and describe the key pathway of effect or describe the nature of the issue. This may consider<sup>5</sup> positive and negative effects on components of the environment or on health, social and economic conditions.
- ii. Identify any clarification or commitments the Proponent could make in its Detailed Project Description and Response to the Summary of Issues that would build confidence that issues can be addressed and managed without further impact assessment<sup>6</sup>, or that can help focus the Tailored Impact Statement Guidelines<sup>7</sup>, if an impact assessment is required.

(c) For each issue and solution discussed, provide a concise, plain-language summary that is appropriate for inclusion in the Summary of Issues.

### 4. Provincial policies, operational guidance, and permits and approvals

Within the mandate and area(s) of expertise of your ministry, list, along with a brief description, specific operational policies or guidance documents that could help address issues and manage effects relevant to the project context.

No specific regulatory or operational policies that are relevant to the project.

---

<sup>2</sup> Note: *effects*, *direct and incidental effects*, and *effects within federal jurisdiction* are defined in section 2 of the *Impact Assessment Act*, which can be found at <https://www.canada.ca/en/impact-assessment-agency/corporate/acts-regulations/legislation-regulations.html>

<sup>3</sup> Guidance: Considering the Extent to which a Project Contributes to Sustainability <https://www.canada.ca/en/impact-assessment-agency/services/policy-guidance/practitioners-guide-impact-assessment-act/guidance-considering.html>

<sup>4</sup> Policy Context: Public Interest Determination under the *Impact Assessment Act* <https://www.canada.ca/en/impact-assessment-agency/services/policy-guidance/public-interest-determination-under-impact-assessment-act.html>

<sup>5</sup> Other considerations may include sources of high uncertainty that complicate predictions; the purpose and need for the Project and selected alternatives.

<sup>6</sup> This could mean that mitigation measures that the proponent has committed to in the Detailed Project Description are referenced in the potential Tailored Impact Statement Guidelines.

<sup>7</sup> For example, regulatory instruments, operational guidance or well-understood mitigation and monitoring measures of proven effectiveness.

5. (a) List and provide a short description of provincial permits or regulatory approvals that might be applicable to the Project.

(b) For each provincial permit or regulatory approval that may be required for the Project, please provide the following information:

- i. Explain any associated framework to address effects on valued components within your mandate.
- ii. Describe any Indigenous consultation activities that would occur, potential timelines for Indigenous participation, and how potential impacts to Indigenous communities are addressed by your ministry.
- iii. Describe any public participation opportunities that would occur, and potential timelines for public participation.

N/A from a tourism perspective

6. Is there any additional information related to the geographic context of the Project (e.g., potential effects to natural heritage features, Indigenous protected and conserved areas, provincial species at risk, provincial policy statements on planning or zoning in the area) for which your ministry has information or authority?

N/A from a tourism perspective
