Regional Assessment of Offshore Wind Development in Newfoundland and Labrador  
Impact Assessment Agency of Canada  
301-10 Barters Hill  
St. John's, Newfoundland and Labrador A1C 6M1

Mr. McDonald,

Thank you for the opportunity to provide feedback on the proposed focus area for the Regional Assessment of Offshore Wind Development in Newfoundland and Labrador.

Parks Canada supports the Committee's approach to focusing the remainder of the Regional Assessment on areas where wind development success is more likely. We agree with the proposed focus area as it allows us to concentrate our analysis on Parks Canada's Protected Heritage Places of greatest relevance. We look forward to seeing the final focus area following input received by the Committee.

Parks Canada will continue to conduct site analysis within the final focus area and will provide recommendations to the Committee as it relates to Parks Canada's Protected Heritage Places and Parks Canada administered World Heritage Sites, with the goal to help inform the Committee's future planning, licensing, and impact assessment processes during the remainder of the Regional Assessment.

Thank you again for the opportunity to provide our feedback.
