To: Nuclear Waste / Déchets Nucléaires (IAAC/AEIC)
Subject: CIAR, Information Request Deep Geological Repository (DGR) for Canada's Used Nuclear Fuel Project

Building a new nuclear dump is very harmful to the environment. The spent fuel is toxic for years, and the water around the area is tested on animals. Please do not continue to pollute. I noticed a lot of wildlife live here. Please preserve the trees at this location. Please do not harm animals with this project. Please do not use animal testing for pollution and effluent monitoring. <https://www.change.org/p/stop-testing-sewer-water-on-laboratory-fish>

Please work with the Canadian Centre for the Alternatives to Animal Methods. <https://www.uwindsor.ca/ccaam/>

Please only use non lethal ways to live with geese, beavers, and other wildlife. Develop a Living With Coyotes program with the animal welfare organization Coyote Watch Canada. www.coyotewatchcanada.com

Please only use non lethal ways to manage wildlife. There are humane, non lethal ways to deal with beavers. Here's a great resource. <https://thefurbearers.com/downloads/PDFs/Beaver%20Book%20-%202019-10-08%20The%20Fur-Bearers.pdf?fbclid=IwAR1fP2wOYQKbWREX0E5QzYBhZLf9VjwMov3p37Vh8ToW1-NeQvAoVATZhEg%0A%0A>

This company makes non lethal products. <https://margosupplies.com/ca-en/>

Conventional rodent control uses cruel methods. The companies use glue traps, and snap traps, which, like legholds, can cause injury. They also use rodenticide, which kills slowly and kills many non target animals.

<https://m.facebook.com/RFOntario/?paipv=0&eav=AfbUBVKF7c1YhT9VJVluqvql7GZ6aUMN4HXsj08GSKGr148rCtpTybY7c3qkHVVijzs>

Killing animals does not solve the problem. Montreal's feeding ban bylaw and Rouge National Park's bear proof bins are far more effective because they remove attractants. Please change your pest control policy to instead remove attractants, and fix holes, along with a humane contraception program. Please invest in non lethal solutions like bear proof bins (which also keep out rats) and public education. Tuffbox is a garbage and recycling bin that keeps out bears and rodents. Please also visit www.bearwithus.org to learn more about bears.

Thank you for using bear bins. Please educate people on how to live with them, and develop a no kill wildlife coexistence strategy. www.bearwithus.org is a great organization. So are the Fur Bearer Defenders. <https://thefurbearers.com/our-work/living-with-wildlife/>

More information on other animals can be found here.
