

Feb 02, 2026

I am in opposition to the Deep Geological Repository for nuclear waste in Northern Ontario.

I am writing this letter as I can no longer sit idle. I cannot sleep without knowing that I voiced my concerns. I am extremely concerned about humanity, wildlife, waterways and the land being devastated by the risks posed by the transport, burial of nuclear waste.

Here is a list of just a few items that are deeply concerning:

- Emergency plans
- Health impacts
- Long term safety
- Radioactive releases
- Water management

Overall, there is a lack of communications & care in all regards to life, water & land. Communities all along the north shore onwards could potentially be impacted by these actions. Consultation needs to be 100% sound. Research needs to be exact & concise. From what I have learned about this issue, it is not safe.

Therefore, I am in 100% opposition to this moving forward.

Thank you for your time

Regards,

Jean Marshall
