**To:** Nuclear Waste / Déchets Nucléaires (IAAC/AEIC)  
**Subject:** Nuclear Deep Geological Waste Repository

I strongly oppose the proposed Deep Repository project by Nuclear Waste Management Organization within Treaty 3 Territory.

Key reasons for my opposition:

- irreversible environmental risk
- violations of Indigenous sovereignty
- water safety concerns: groundwater moves and there are interconnecting bodies of water. Out of sight out of mind is not the way to proceed. The earth is constantly shifting.
- chronic exposure to an will impact physical & mental wellness
- this project will deposit radioactive waste within a watershed that also sustains ecosystems in boundless connected water systems
- there is no true consent by the local community as all communities will be affected.

The nuclear corporations must be held accountable for safe storage that will not harm today's or future ecosystems. Their shareholders only want profit but the health of each person, animal species, flora and fauna are more important than money.

Kindly consider a better way to take care of the pollution that is caused by the nuclear industry.

Sincerely

Wanda Dzierzanowski
