Subject: nuclear wast sites

Hello, my name is Josefine , and I live in Alberta. It has come to my attention that the Nuclear Waste Management Organization wants to have a deep geological repository between Ignace and Dryden, in Treaty 3 Territory. I am calling for a full impact assessment and public hearing for the Transportation of Radioactive Waste through a 1800 km stretch of public two-lane roads. There will be a constant transport of 2-3 trucks of radioactive waste per day for 50 years! There will be radioactive releases from each transport to when the wastes are abandoned underground.

Once more, this needs a full impact assessment, please ,consider the dangers of that, Josefine Singh
