The Nuclear Waste Management Organization (NWMO) is nothing more than a lobby group for governmental and commercial nuclear waste producers. If you took a ride on their magic carpet (woven of lies, half truths, hidden agendas and bribing and bullying) you would believe you were travelling over a crystalline structure in an uninhabited land. That's the first lie. The Arctic watershed they plan to use as a nuclear sewer is home to a million plus people. They have hidden that aspect of their so called plan.

The second lie is that it is safe. There is no history that confirms this.

The third lie is that affected people agree. No one except those lavished with money consent. All native leaders have said NO. The only agreement is from one reserve who is being lavished with money.

How can people consent to using this region as a nuclear dump? They have not even been told that their lives are going to be torn apart by these predators.

This is an existential issue for people in the region. When overland flooding from their planned nuclear sewer closes the highways the United States which dominates NWMO may get their wish of annexing our country.

Who will benefit from this rape of our environment? Not the people living in this region or Winnipeg or the Arctic watershed. The ones benefitting will be far away from those dying of painful nuclear poisoning like a Putin victim.

This plan is predatory and sociopathic. It reflects poorly on Canada's "good guy" image in the world. This will be challenged when this sacrilege to the environment and its people plays out in the international courts.

MY VOTE IS NO!
