Re: Carpenters' Union Support for the Riverside Generating Station Project

UBC Local 1256, an affiliated local union of the United Brotherhood of Carpenters and Joiners of America (the "UBC" or "Carpenters' Union") representing over 1,000 carpenters and other allied trades in the Sarnia-Lambton area, would like to formally issue this letter in support of the proposed the Riverside Generating Station project. As a dedicated advocate for skilled tradespeople and the broader region in which our members work, we want to make clear the positive impact that this project will have on the local workforce, economy and long-term sustainability of Sarnia-Lambton and its surrounding areas.

The Riverside Generating Station provides a vital opportunity to create and sustain high quality employment for our members, who bring decades of expertise in delivering complex construction projects safely and efficiently. Our union is committed to the highest standards of worker safety, environmental responsibility and community well-being. With Sarnia-Lambton's established reputation as a hub of industrial excellence, our skilled carpenters are well-equipped to contribute to successful execution of this project.

The Carpenters' Union is confident that, through collaboration with partners and local stakeholders, the Riverside Generating Station will be a model of safe, sustainable and innovative development.

UBC Local 1256 members stand ready to contribute their expertise to the successful construction of the Riverside Generating Station Project, and we thank you for the opportunity to offer this submission in support of the project.

Sincerely,

Veselko (Ves) Suvajac

Local Union Coordinator Local 1256

Campaign Director - ICI Carpentry - SW Ontario
