**Impact Assessment Agency of Canada**

**Subject: Letter of Support for the Atura Power Proposed Riverside Generating Station Project (Registry #89801)**

To whom it may concern,

The Bluewater Association for Safety, Environment, and Sustainability (BASES) is a regional non-profit industrial association representing the petrochemical industry in Sarnia-Lambton. We are writing to express our support for the proposed Riverside Generating Station project, submitted by Atura Power.

With many of our partners directly involved in and impacted by projects of this scale, we emphasize the importance of supporting the well-being of local workers and the broader community. As a long-term facility expected to operate for decades, Riverside will provide sustained employment opportunities, strengthen the local workforce, and contribute to the safety, resilience, and long-term prosperity of the Sarnia-Lambton region.

Reliable energy infrastructure is important for the economic and social well-being of Sarnia-Lambton. For generations, Sarnia-Lambton has been recognized as a centre of industrial expertise, with a skilled workforce and supply chain experienced in managing complex projects safely and effectively. Our established industrial partnerships and collaborative approach further ensure that initiatives like Riverside Generating Station can be executed efficiently, supporting a lower-carbon energy future while continuing to safeguard workers, the environment, and the community.

BASES fully supports the Riverside Generating Station project and is confident that Sarnia-Lambton's skilled workforce and industrial expertise can help ensure its safe, sustainable, and successful development. Thank you for considering our support in your review of the project.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Vaillant", is positioned above the typed name.

Jason Vaillant, General Manager  
Bluewater Association for Safety, Environment, and Sustainability
