Subject: Green energy over nuclear

Hello

For the future of Ontario and my kids, please get OPG to evaluate whether energy efficiency, renewables, and energy storage are lower-cost, faster, safer, and more secure ways to meet Ontario's electricity needs than building a massive new nuclear station at Port Hope.

We have the space for wind and solar. We have the lakes for turbines and hydro electric. Let's make Canada and Ontario the leaders in renewable energy.

Marcel de Koning
An engineer and concerned parents.
