Subject: Impact of New Nuclear Power Plants

To Whom It may concern,

I would like to voice my opposition to the proposed new reactors to be installed in Ontario. Nothing about this plan makes sense to me. Firstly as an OPG customer this will adversely affect my hydro rates. Why has this plan been given priority over alternative energy, an option that would be up and running in half the time at 1/4 of the cost to ratepayers. Then there is the environmental factor. We have the issue of shipping the waste to a largely unwilling host on a highway that has already been deemed unsafe for public use due to the present load of transport traffic and the inadequacies of the highway to handle it. I would ask the government to at least consider the options to this expensive risky option.
